NOTICES OF MOTION

NOTICES RENEWED ON 27 OCTOBER 2005

- 1 **MR BAILLIEU** — To move, That this house condemns the Minister for Planning for — (a) failing to consult Victorian communities, in particular Victorian coastal communities, in regard to the establishment of guidelines for the development of wind energy facilities; and (b) failing to adequately protect sensitive areas of Victoria's precious coastline from the adverse impact of wind energy facilities.
- 2 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Education and Training for alienating and then allowing the complete development and destruction of community parkland in Malleehen Street, Werribee when this park has for more than 20 years been maintained as parkland including a playground and has provided the only safe and easily accessible public open space for neighbourhood children.
- 3 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for authorising the complete destruction and re-development of community parkland at the site of the former Karingal Park Secondary College in Frankston.
- 4 **MR BAILLIEU** — To move, That this House condemns the Minister for Education and Services and the Minister for Planning for failing to ensure the retention of public open space adjacent to the Irabina Special School in Kingloch Parade in Wantirna.

Second reading and subsequent stages to be moved and debated concurrently according to Order of the House, 20 October 2005

-
- 5 **MRS SHARDEY** — To move, That the Bracks Labor Government be condemned for its failure to stop chroming in Department of Human Services funded facilities and for giving tacit approval for chroming through its guidelines on inhalant use which state: ‘it is important that workers take into account the importance of social bonds and the sense of belonging derived from group activities, including when abusing inhalants in a group’.
- 6 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Environment for failing to prevent the unilateral destruction by Melbourne Water of some 200 mature trees at Pridmore Park in Hawthorn.
- 7 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Environment for failing to prevent the unilateral closure of a Yarra River walking track in Hawthorn and for failing to assist the City of Boroondara and local residents in working to have the walking track reopened.
- 8 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Education and Training for secretly initiating a proposed sale of land from Ashwood College in Burwood including a significant wetlands area, for the purpose of a housing development.
- 9 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for issuing, on 23 May 2003, without notice, consultation or explanation, a new ministerial order regarding home builders warranty insurance to exempt Government agencies through the Director of Housing from the Government’s own home builders warranty insurance requirements, but leaving private builders to suffer the burden of this rapidly failing and manifestly inadequate and inequitable system.
- 10 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to adequately monitor the impact and consequences of the Government’s home builders warranty insurance system on consumers and builders, in particular inadequate cover, inconsistent eligibility criteria, inequitable demands on builders, high premiums, non-recognition of previous performance, incapacity to tender, enormous time loss and administrative burden and aggregate work limits.
- 11 **MR PERTON** — To move, That this House condemns the Bracks Government for withholding vital maintenance funding from schools again this year, for cutting corners and for politicising the upkeep of school grounds and buildings in Victoria at the cost of certainty, community safety and the proper, efficient forward planning of the educational system, and for presiding over the destruction of a skills and competencies base surrounding the development of the Physical Resource Maintenance System in education, which must be restored.
- 12 **MR PERTON** — To move, That this House condemns the Bracks Government for its broken promise to spend \$50 million to fund the purchase of what were in its own words ‘urgently needed’ new relocatable classrooms for Victoria’s schools and for instead paying for expensive maintenance of seriously outdated portable classrooms which are constructed from asbestos and should be retired.
- 13 **MR BAILLIEU** — To move, That this House urges the Victorian Government to immediately alter its windfarm guidelines to ban windfarms from sensitive environmental and coastal locations.

-
- 14 **MR BAILLIEU** — To move, That this House warmly congratulates all those associated with the concept and production of the book *You Are Not Alone* by Sane Australia and, in particular, congratulates Dan Halloran, an extraordinary 15-year-old Victorian whose personal experience dealing with the mental illness of his mother Virginia, and the dedication of his father John, inspired the book — a book which provides the chance for children with a parent or family member with a mental illness to understand and cope just as Dan and his father coped with not only Virginia’s mental illness but also her tragic death from cancer last year, following a long problematic diagnosis and treatment regime, the truth of which still awaits resolution by the Minister for Health.
- 15 **MR PERTON** — To move, That this House condemns the Bracks Government for its continued failure to respond to Questions on Notice and be open and accountable for its acts.
- 16 **MR BAILLIEU** — To move, That this House gives its unequivocal support to the Australian Rugby Union in its campaign to overturn the proposed ban on the singing of *Waltzing Matilda* at the forthcoming World Cup and urges fans, in the great traditions of the song itself, to sing it anyway.
- 17 **MR BAILLIEU** — To move, That this House calls on the State Government to guarantee that the proposed development at Burnley Gardens not be called in.
- 18 **MRS SHARDEY** — To move, That this House calls on the Chair and other Government members of the all-party Family and Community Development Committee to stand up to the Premier’s outrageous ‘Guidelines for Submissions and Responses to Inquiries’ that they are now required by the politburo Department of Premier and Cabinet to implement, and that these Government members come forward and detail to the House each occasion when independent departmental and statutory authority submissions and advice have been censored, edited or vetoed so as to compromise Government members’ responsibilities to this Parliament’s independent committee work.
- 19 **MR PERTON** — To move, That this House calls on the Chair and other Government members of the all-party Public Accounts and Estimates Committee to stand up to the Premier’s outrageous ‘Guidelines for Submissions and Responses to Inquiries’ that they are now required by the politburo Department of Premier and Cabinet to implement, and that these Government members come forward and detail to the House each occasion when independent departmental and statutory authority submissions and advice have been censored, edited or vetoed so as to compromise Government members’ responsibilities to this Parliament’s independent committee work.
- 20 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to protect Melbourne’s open space resources and undermining the amenity of that open space including at Royal Park, Jolimont, Kew Cottages, Burnley Gardens, Werribee, Frankston, Bayswater and the Yarra.
- 21 **MR BAILLIEU** — To move, That this House condemns the Minister for Transport and the Minister for Planning for their silence on the proposed closure of the Swanston Street entrance to Melbourne Central Train Station on the corner of La Trobe Street which will inconvenience thousands of public transport users, disrupt the popular train/tram interchange and force commuters to undertake a circuitous route through the Melbourne Central Shopping centre to access the station.

-
- 22 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for doing nothing to prevent the practice of Councils rejecting applications for in-ground swimming pools because of their clearly ludicrous and arbitrary contention that the excavation involved would contravene local covenants preventing quarry or mining in metropolitan Melbourne.
- 23 **MR PERTON** — To move, That this House condemns the Bracks Government for failing the students of Daylesford Primary School by deliberately setting a staffing budget for the school which will force the school to shed experienced staff and cut support programs for students and, further, that this House agrees with the School Council President, Colin Priest, that this is ‘deplorable for a Government that had education as a key election promise’ and ‘this funding crisis is having a negative effect on teacher and student morale’.
- 24 **MR PERTON** — To move, That this House condemns the Member for Ballarat East for failing the students of Daylesford Primary School by acquiescing to the Bracks Government staffing budget for the school which will force it to shed experienced staff and cut support programs for students and further condemns him for failing to defend the right to a good education in the state schools of Daylesford.
- 25 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Thomastown West Primary School by capriciously imposing a \$10,000 WorkCover penalty which will cause a reduction in the size of the teaching staff at the school and, further, that this House agrees with the School Council President, Lisa Courescas, that this Government should ‘rescind this unjust financial imposition on schools’.
- 26 **MR PERTON** — To move, That this House condemns the Member for Thomastown for failing the students of Thomastown West Primary School by acquiescing to the Government’s imposition of a \$10,000 WorkCover penalty and failing to stand up for the rights of the students and parents of Thomastown West Primary School.
- 27 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Lorne-Airey’s Inlet P-12 College by capriciously imposing a \$10,000 WorkCover penalty which will cause a reduction in the size of the teaching staff at the school and further, that this House expresses its support for the School Council President, Angus McKenzie, who has said, ‘this school council is disappointed and angry at the Government’s policy of devolving WorkCover premium to schools; we have already endured one bitter disappointment this year when the long awaited building project was not listed for master planning’.
- 28 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Daylesford Secondary College by capriciously imposing a WorkCover penalty which will cause a reduction in the size of the VCE teaching staff at the school and, further, that this House agrees with the Daylesford Secondary College School Council President, Barry Golding, and the Principal, Heather McIntyre, that ‘this policy is an indictment on those who wrote it and those who support it; in the end the losers are our students’.
- 29 **MR PERTON** — To move, That this House condemns the Member for Ballarat East for failing the students of Daylesford Secondary College by acquiescing to the Bracks Government staffing budget for the school which will force it to shed staff because of a WorkCover penalty imposed by the Minister for Education Services and further condemns him for failing to defend the right of children to a good education in the state school of Daylesford.

- 30 **MR PERTON** — To move, That this House dissents from the ruling of the Speaker on 19 November 2003 when she used Sessional Order 10 in an impulsive fashion and for her refusal to follow the ruling of Deputy Speaker McGrath recorded in the *Rulings from the Chair*, July 2003, at p 71 which reports as follows ‘the Deputy Speaker drew attention of the House to his concern about continual requests for the withdrawal of words that have, in the past, been used regularly in the cut and thrust of debate. He pointed out that when members decide to take exception to words used in the House, they should be mindful that they do not paint themselves in a corner and so reduce the vocabulary that can be used that future debates will be inhibited and that common sense is needed’ and instead for using the narrowest interpretation of parliamentary practice.
- 31 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for — (a) doing nothing to prevent the recent but repeated refusal of applications for in-ground swimming pools by VCAT, and the Cities of Glen Eira and Boroondara in particular, on the grounds that excavations for such pools would constitute ‘quarrying’ and hence be in conflict with old covenants preventing quarrying or mining in metropolitan Melbourne; and (b) forcing residents with applications to expend tens of thousands of dollars pursuing legally difficult applications for covenant removals despite in-ground pools existing in immediately adjacent homes.
- 32 **MR BAILLIEU** — To move, That this House congratulates the Australian Rugby Union for its exemplary conduct of the 2003 World Cup, Martin Johnson and the English team for their amazing last gasp victory, George Gregan and the Wallabies for their sensational efforts and all other teams, fans and volunteers for their high-spirited, good-hearted support of the heavenly game and this tournament in particular and urges the earliest possible inclusion of a Victorian team in the Super 12 competition, pending a return bout in 2007.
- 33 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Osborne Primary School by capriciously imposing a \$10,000 WorkCover penalty which will cause anxiety for the school and its management and further, that this House expresses its support for the School Council President of Osborne Primary School Mr Ric Bugg, who has said ‘were the school to move to a significant WorkCover disincentive in the future, (potentially through no fault of our own), up to \$10,000 would not be available for the education of our children; we find this totally unacceptable’.
- 34 **MR PERTON** — To move, That this House condemns the Member for Western Port for failing the students of Osborne Primary School by acquiescing to the Government’s imposition of a WorkCover penalty and failing to stand up for the rights of the students and parents of Osborne Primary School.
- 35 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Highvale Secondary College by capriciously imposing a \$10,000 WorkCover penalty which will cause anxiety for the school and its management insofar as they acknowledge that under this system ‘anticipated savings can quickly turn into an actual loss as a result of a serious but unpreventable accident’; and (b) expresses its support for the College Council President, Mr Daryl Lynch, who says ‘the Highvale Secondary College Council wishes to express in the strongest terms its opposition to the imposition of the partial transfer of responsibility for WorkCover to schools in 2004 and asks that this decision be reversed ...; the threat of this WorkCover disincentive arrangement will compromise schools keen to improve conditions through additional local fundraising, as well as creating considerable uncertainty in their budgeting for future expenditure ...’.

- 36 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for knowingly misleading the House when she said in debate on changes to the Urban Growth Boundary that public submissions made on the implementation of Melbourne 2030 were available on the Government website when they are not, and never have been.
- 37 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to provide any legal advice that submissions made on the implementation of Melbourne 2030 could not be made available because of the Privacy Act (as claimed at a briefing on changes to the Urban Growth Boundary) when the request for submissions specifically contemplated public release and legislation and standard practice provides that all submissions to panels are made public.
- 38 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Coburg West Primary School by capriciously imposing a \$10,000 WorkCover penalty and further, that this House notes the comment of the school council which states — ‘(a) our school has incurred a premium cost to the school of \$10,000 which will have a considerable impact on the education provided to the children; as this premium will be deducted from the staffing credit component in the school global budget the direct result is there will be less teaching time available; (b) we agree that schools should be prepared to accept responsibility for situations that they believe are within their sphere of management, but in many cases WorkCover liabilities are way beyond our control; and (c) at our school we take the responsibility of providing a safe workplace extremely seriously and have in place a rigorous process of safety inspections including the provision of professional development in voice care’.
- 39 **MR PERTON** — To move, That this House condemns the Member for Brunswick for failing the students of Coburg West Primary School by acquiescing to the Government’s imposition of a \$10,000 WorkCover penalty and failing to stand up for the rights of the students and parents of Coburg West Primary School.
- 40 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Traralgon South Primary School by capriciously imposing a \$2,900 WorkCover penalty which will cause great financial hardship to this small school community whose annual income through fundraising will be absorbed; and (b) expresses its support for the School Council President of Traralgon South Primary School Chris Madsen who commented ‘the school council believes that these changes unfairly impose a financial penalty on schools that ultimately penalises students at our school ... we also object to the proposed capping thresholds and methods of calculation; for our school the ‘penalty’ cap is set at \$2,900, yet the ‘incentive’ cap is a mere \$580’.
- 41 **MR PERTON** — To move, That this House condemns the Member for Morwell for failing the students of Traralgon South Primary School by acquiescing to the Government’s imposition of a \$2,900 WorkCover penalty and failing to stand up for the rights of the students and parents of Traralgon South Primary School.
- 42 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Gilmore College for Girls, by capriciously imposing a \$10,000 WorkCover penalty; and (b) notes the comment of the school that ‘one of the teachers fell over a piece of uneven pavement while on a school excursion; what could we have done to prevent this ... we have recently been awarded the National Literacy Award receiving \$10,000 to strengthen our laudable work in this area; perhaps we should simply redirect the cheque’.

- 43 **MR PERTON** — To move, That this House condemns the Member for Footscray for failing the students of Gilmore College for Girls by acquiescing to the Government's imposition of a \$10,000 WorkCover penalty and failing to stand up for the rights of students and parents of Gilmore College for Girls.
- 44 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Environment for failing to release the Victorian Wind Atlas as promised and for continuing to conceal its contents from stakeholders, particularly local councils and resident groups, when that same Wind Atlas has been made available to the wind industry.

- 46 **MR BAILLIEU** — To move, That this House condemns the Premier for riding roughshod over local communities and for mistreating correspondence strongly critical of the Government's decision on the Burnley Gardens development and, indeed, writing back thanking just such a correspondent for his 'support for the proposed development'.
- 47 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Greenvale Primary School by capriciously imposing a WorkCover penalty which will cause great financial hardship to this school whose annual income through fundraising, along with all of its direct educational benefits to the students, will be absorbed by this impost; and (b) expresses its support for the School Council President of Greenvale Primary School, Mr Glen Moore, who has said '... this will just put more pressure on the school's ability to deliver its programs which basically means the kids will miss out for what I believe to be a penny pinching exercise by the State Government ... the Government seems to have little idea of the nature of the work teachers, principals, assistant principals etcetera have in today's environment ...'.
- 48 **MR PERTON** — To move, That this House condemns the Member for Yuroke, the Member for Melbourne North Province; the Minister for Local Government, and Housing, and the Minister for Small Business, and Information and Communication Technology, for failing the students of Greenvale Primary School by acquiescing to the Government's imposition of a WorkCover penalty and failing to stand up for the rights of the students and parents of Greenvale Primary School.
- 49 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Drysdale Primary School by capriciously imposing a system of WorkCover penalties which will cause anxiety for the school and its management who will have to work hard to preserve the slender \$9 margin keeping them in credit and not deficit this year; and (b) agrees with the School Council President Jim Day, and Principal Claire Wilson, who say 'it is the Department's ultimate responsibility to ensure a safe workplace for their employees ... parents should not have to see their fundraising monies spent on WorkCover premium liabilities'.
- 50 **MR PERTON** — To move, That this House condemns the Member for Bellarine and the Members for Geelong Province for failing the students of Drysdale Primary School by acquiescing to the Government's imposition of an unfair system of WorkCover penalties and failing to stand up for the rights of the students and parents of Drysdale Primary School.

- 51 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Cobden Technical School by capriciously imposing a \$10,000 WorkCover penalty, causing the school to review and likely reduce its commitments to school sporting competitions; and (b) expresses its support for the school view that ‘Cobden Technical School faces a charge against our school global budget for a WorkCover premium of \$10,000; this is in spite of the fact that one “injury” that has caused an increase in our premium was not one we could have planned for nor guarded against ... Council has concluded that we might well be advised to reduce the level of sporting competition in the school for it was at a school athletics event that the injury referred to above occurred ... was it intended when this policy was drafted to have this impact on schools’.
- 52 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Langwarrin Primary School by capriciously imposing an \$8,000 WorkCover penalty which will cause a deficit at the school, an amount equal to the school’s annual fundraising budget, that will directly impact on the school’s educational priorities and result in the slashing of school programs, severely disadvantaging students at the school; and (b) agrees with the School Council President Phil Cavill, and Vice President Lindsey Harris, who say ‘that schools are now made to pay a portion of WorkCover claims is an insinuation that school principals are not properly managing the making of such claims by staff ... WorkCover is a systemic problem and not the responsibility of individual schools’.
- 53 **MR PERTON** — To move, That this House condemns the Member for Hastings and the Member for Western Port Province for failing the students of Langwarrin Primary School by acquiescing to the Government’s imposition of an \$8,000 WorkCover penalty and failing to stand up for the rights of the students and parents of Langwarrin Primary School.
- 54 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Tinternvale Primary School by capriciously imposing a system of WorkCover penalties which will cause a reduction in funding to the tune of \$7,000 this year alone, which would otherwise have benefited the children and their schooling; and (b) expresses its support for the School Council President Lynda Green, who has said ‘this decision affects all the members of the school community, in particular our children ...’.
- 55 **MR PERTON** — To move, That this House condemns the Member for Kilsyth and the Labor Member for Silvan Province, for failing the students of Tinternvale Primary School by acquiescing to the Government’s imposition of a system of WorkCover penalties, shifting costs onto schools and for failing to stand up for the rights of the students and parents of Tinternvale Primary School.
- 56 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of St Albans Heights Primary School by capriciously imposing a system of WorkCover penalties which will cause a deficit of \$6,670 at the school that will directly impact on the school’s educational priorities; and (b) agrees with the School Council President Julie Van Staeden, and its Principal George Kalandadse, that this Government should make ‘an honest attempt at consultation with a view to investigating how schools and the Department can work together to identify and best manage injury prevention position on schools’; and ‘... if the Government is so keen to lower WorkCover costs and provide a healthy and safe workplace for their staff, then we believe that they should review the Physical Resources Management System (PRMS) program and

recommence the payment of maintenance money so that schools can return to the PRMS audited items and have them repaired ...’.

- 57 **MR PERTON** — To move, That this House condemns the Member for Derrimut and the Members for Doutta Galla Province for failing the students of St Albans Heights Primary School by acquiescing to the Government’s imposition of a \$6,670 WorkCover penalty and failing to stand up for the rights of the students and parents of St Albans Heights Primary School.
- 58 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of North Geelong Secondary College by capriciously imposing a system of WorkCover penalties which will cause financial difficulties for the school that ultimately penalise students; and (b) agrees with the School Council President Gail Lowe who said ‘to help reduce WorkCover claims, school councils and principals require adequate resources, professional development and professional support, not financial “incentives” which ultimately jeopardise school programs; students in the Victorian public education system should not pay for the inadequacies of the Victorian Department of Education, or the funding policies of the Government of the day’.
- 59 **MR PERTON** — To move, That this House condemns the Members for Geelong Province for failing the students of North Geelong Secondary College by acquiescing to the Government’s imposition of a system of WorkCover penalties and failing to stand up for the rights of the students and parents of North Geelong Secondary College.
- 60 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Spotswood Primary School by capriciously imposing a system of WorkCover penalties which will cause anxiety for the school and its management as well as the wider network of which it forms a part, that will result in the slashing of school programs severely disadvantaging students; and (b) agrees with the School Council Secretary, Peter McIver, who says ‘the School Council believes that these changes unfairly impose a financial penalty on schools that ultimately penalises students ... students in the Victorian public education system should not pay for the inadequacies of the Department of Education or the funding policies of the government of the day’.

- 62 **MR BAILLIEU** — To move, That this House notes with alarm the annual report of the Surveyor General and in particular the failure of the Government to address the need for high priority maintenance of the Survey Control Network, the fundamental cornerstone of Victoria’s Land Property system, when that maintenance is estimated to require up to \$70 million and is recommended and supported by the Auditor-General, the Surveyor General, RMIT, and the surveying industry in general, and condemns the Minister for Planning and Land Victoria for rejecting the recommendations in this regard by a review panel established by the previous Minister.
- 63 **MR BAILLIEU** — To move, That this House notes with alarm the annual report of the Surveyor General and in particular the Surveyor General’s comments that administrative arrangements undertaken by the Government and the previous Minister which transfer responsibility for the Survey Control Network and the calibration of surveying equipment to Land Victoria’s Land Information Group and the transfer of the supervision of the Central Plan

Office to the Land Registry, ‘continue to not align with legislation’ and condemns the Minister for Planning for not acting to overturn these arrangements when, as the Surveyor General reports, ‘these arrangements have been reported by the Surveyor General to the Department for four successive years and the anomalies have also been reported to the Parliament by the Auditor-General’, and further when he reports that ‘there have been no actions undertaken to ensure alignment with legislation’.

- 64 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Newlyn Primary School by capriciously imposing \$8,000 WorkCover penalties which will cause anxiety for this small rural school and its management and which may lead to instances of systemic discrimination against teachers who have been injured in a work place, and place unacceptable pressure on principals to influence staff WorkCover claims and processes to an extent that is unfair and unreasonable; and (b) agrees with the words of School Council President, Andrew Joliffe, who says ‘occupational health and safety is clearly a responsibility of the employer, that is the Department of Education and Training’.
- 65 **MR PERTON** — To move, That this House condemns the Member for Ballarat East and the Members for Ballarat Province for failing the students of Newlyn Primary School by acquiescing to the Government’s imposition of an \$8,000 WorkCover penalty and failing to stand up for the rights of the students and parents of Newlyn Primary School.

- 67 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Environment for failing to enforce Environment Protection Authority buffer zones in the Greater Dandenong Planning Scheme by giving planning approval, despite the wishes of local residents and the Council, to a school, namely Mt Hira College, within that buffer zone around areas of hazardous waste collection, thereby establishing a precedent now being exploited by other applicants including for a church at 198 Perry Road, Keysborough, now supported by Council officers, with the extraordinary comment in an officer’s report that ‘it has now become common knowledge ... that places of worship are not considered to be among land uses that are discouraged in the buffers precinct, as they do not entail large gatherings of people over long periods of time’.
- 68 **MR BAILLIEU** — To move, That this House — (a) notes with grave concern the comments of Environment Protection Authority head, Mr Mick Bourke, at a public hearing of the Outer Suburban and Interface Services and Development Committee on Monday 24 November 2003, when he said that Noise Control Guidelines for Windfarms were only guidelines and that detection of breaches would probably require several years of monitoring; and (b) condemns the Minister for Planning and the Minister for Environment for not ensuring that strict standards of noise control for windfarms are both provided and enforced.
- 69 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Doncaster Secondary College by capriciously imposing a \$10,000 WorkCover penalty, the maximum under the Government’s system, that will directly and negatively impact on the school’s educational priorities and planning, resulting in programs being slashed and severely disadvantaging Doncaster students.

- 70 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Avenel Primary School by capriciously imposing a system of WorkCover penalties which will cause this small, under funded rural school to go into ever deeper deficit as a result of ongoing liabilities stemming from a workplace injury sustained three years ago, which will directly impact on the school's educational priorities and result in school programs being slashed, severely disadvantaging students at the school; and (b) agrees with the School Council President Clyde Joachim who says 'Students in the Victorian public education system should not pay for the inadequacies of the Victorian Department of Education, or the funding policies of the government of the day'.

- 193 **MR PERTON** — To move, That this House notes that physical education in Victorian schools faces extinction in many schools under curriculum changes being forced through by Labor's Minister for Education and Training, despite expert advice and community feedback to the contrary, the Bracks Government is set to dump physical education (PE) from the core curriculum and demote it to a minor and optional activity; at a time when childhood obesity is soaring and the experts are saying our kids need to be more active, Labor is moving in the opposition direction and trying to reduce the amount of exercise our kids get at school; and therefore this House supports the call by the Victorian branch of the Australian Council for Health, Physical Education and Recreation that physical education be restored to the status of a discipline in the curriculum for 2005 and beyond; and this House condemns the Minister for Education and Training for trying to ram this change through regardless of the evidence and the research.

- 217 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for continuing to claim that she was prevented by the law from intervening in the Mitcham high rise towers debacle and that recent changes to the *Victorian Civil and Administrative Tribunal Act 1998* had restored the Minister's capacity to call in such projects when that power existed previously, a fact known and understood by every planner, council and planning department official in Victoria but not apparently by the Minister.

- 304 **MS CAMPBELL** — To move, That this House commends the unnamed Liberal member cited in *The Age* on 29 March 2005 who rightly claimed there 'are a few Liberal MPs' who 'deserve a bullet' and though no Labor member would condone murder, we commend him for his honest, though cowardly anonymous metaphorical appraisal of his party's current turmoil.

- 318 **MS CAMPBELL** — To move, That this House sympathises with the Liberal Party for its obtuse and naive policy, if it can be called such, of introducing a Hoon Hotline which will do nothing more than obfuscate the problem, increase delays and give vexatious complaints with an axe to grind a public forum in which to do so and detract from the appropriate mechanisms, 000 for an emergency and Crime Stoppers.
- 319 **MS CAMPBELL** — To move, That this House laments that the literary community of Victoria will be, to the delight of members on this side of the House, denied the chance to read the latest round of propaganda on former Premier Jeff Kennett, as the Bracks Government rightly refuses to indulge Mr Kennett's ego any further at the expense of Victorian dollars for a work which would be better suited to its subject matter were it to be printed on softer, perforated paper.

- 322 **MS ASHER** — To move, That this House notes the Government's new policy to try to deliver major projects on time and on budget — the Gateway Review process — described by the Minister as follows 'This government's way of dealing with that is to methodically go through six gates — one, two, three, four, five and six. As we go through those gates we will announce the outcomes. As we go through those gates we will with confidence go to the next step so that we do not have cost overruns and we do have strategic decisions in place' and expresses its curiosity and incredulity as to whether this method can deliver projects on time and on budget — something two previous Ministers for Major Projects could not.

NOTICES GIVEN ON 7 FEBRUARY 2006

- 502 **MR BAILLIEU** — To move, That this House condemns the Member for Bendigo East and the part-time Minister for Planning for failing to attend a public meeting on 31 January 2006 at Epsom in Bendigo, called by the Epsom and Huntly Community Action Group, and attended by nearly 800 people who unanimously rejected the Government and Bendigo Council proposal to sell public park land in Howard Street, Epsom for development of a supermarket.
- 503 **MRS POWELL** — To move, That this House calls on the Minister for Health to work cooperatively with the Federal Government to make potentially life saving drugs, such as Herceptin, available on the Pharmaceutical Benefits Scheme so that Victorian cancer sufferers, like Shepparton woman Tania Calley, can access vital treatment without having to sell homes and possessions to finance such treatment.
- 504 **DR SYKES** — To move, That this House condemns the Minister for Water for sacking the Broken System Reliability Reference Committee established by the Minister to provide him with advice on maintaining the security of supply of irrigation water in the event of Lake Mokoan being decommissioned, and the House therefore calls upon the Minister to — (a) reinstate the Committee to fulfill its original terms of reference in particular to provide the Minister with advice on offsets and oversee the implementation of these offsets which must be in place before any irreversible decommissioning works are commenced; and (b) commission and publish the findings of an independent engineering audit of the reliability of water supplies currently provided by the Broken system with Lake Mokoan and the reliability of supply to water users likely with the lake decommissioned and the proposed offset measures in place.
- 505 **MR WELLS** — To move, That a select committee of six members be appointed to inquire into and report on all the factors that led to the 2006 bushfires in Victoria, and in particular those in the Grampians and at Moondara, to determine the level of severity of those fires and all counter measures that were taken to minimise the damage resulting from those bushfires and to recommend appropriate measures to be taken in the future regarding fire precautions, fire response and fire recovery, and in particular — (a) the adequacy of forest and park management and fire prevention practices; (b) the adequacy of fire mitigation and suppression practices with particular reference to the effectiveness of fuel reduction burning of the forested areas of the State in reducing the intensity of bushfires; (c) the impact of intense bushfires on the forest environment; (d) the maintenance of the diverse ecology of Victoria's forests and national parks; (e) fire management and response by the Department of Sustainability and Environment and the Country Fire Authority and any other government or non-government agencies or organisations; (f) the effectiveness of communication systems, the adequacy of field communication between the control centre and the fire-front and the adequacy of early warning systems; (g) an analysis of the coordination between and logistic support of all organisations involved; (h) the timeliness and adequacy of the immediate response to the fires; (i) the impact of the fires on the age distribution of vegetation species in the hardwood forest areas with particular reference to future management of forests and national parks; and (j) appropriate relief and recovery measures.
- 506 **MS ASHER** — To move, That this House calls on the Minister for Planning to do everything in his power to stop the totally inappropriate four-storey development proposal at Warleigh Grove, Brighton.

- 507 **DR SYKES** — To move, That this House calls upon the Minister for Water to guarantee that the — (a) increased flood risks to Benalla, Shepparton, Broken River and Broken Creek landholders caused by the decommissioning of Lake Mokoan are assessed by independent experts; (b) flood risk assessments will include comparisons with the risks when Lake Mokoan and Lake Nillahcootie operate under the original operating guidelines which placed a high priority on flood mitigation; and (c) findings of the report are available for public scrutiny before the report is finalised.
- 508 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to attend the Annual Awards of the Planning Institute of Australia on 18 November 2005 at Federation Square.
- 509 **MR THOMPSON** — To move, That this House condemns the Bracks Government for withholding a report by the State Ombudsman regarding a horrific case where a foster mother gouged out a baby's teeth which tragedy resulted from the failure of the Government to follow advice from a paediatrician that the child not be returned to the foster carer.
- 510 **MS ASHER** — To move, That this House calls on the Minister for Planning to take note of the hundreds of objections to an inappropriate four-storey development proposal in Warleigh Grove, Brighton, and to protect the amenity of this residential area.
- 511 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning and Heritage Victoria for failing to recognise the heritage significance of the Camberwell Railway Station and for succumbing after distortion of usual processes to Government pressure to not register the Station.

- 513 **DR NAPTHINE** — To move, That this House notes that the following hospitals in Western Victoria received funding for major redevelopments under the previous Kennett Liberal Government — Hamilton, Portland, Heywood, Casterton and Horsham — and calls on the State Government to provide the full funding necessary to upgrade and redevelop the Warrnambool hospital in the May State Budget.

- 512 **MR ROBINSON** — To move, That this House congratulates the Victorian WorkCover Authority on its achievement through 2004–05 of a \$775.2 million profit, an actuarial release of \$439 million, a further 10 per cent reduction in premiums saving employers \$170 million per year, and maintaining premiums as the second lowest in Australia.
- 513 **MR DELAHUNTY** (*Lowan*) — To move, That this House notes the worst Grampians bushfire on record and that many people in Western Victoria are calling for an independent inquiry headed by a member of the judiciary to examine such things as fuel reduction burns, management and control of the fire fighting operations, provision of access roads not impeded by vegetation, all aspects of logistics and communications, property and livestock losses and

replacement of fixed assets and care of livestock and that evidence be taken in the Grampians region and involve people who were at the fire front and experienced many difficulties.

- 514 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing as the self-appointed responsible authority to enforce the vegetation protection overlay at the Kew Residential Services site, failing to implement and enforce the tree protection plan on the site and through his negligence allowing the destruction and removal of specifically heritage protected trees on the Kew site.
- 515 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for threatening the Boroondara Council and the Hawthorn and Tooronga communities by demanding Boroondara Council proceed with a Planning Scheme Amendment for the Tooronga Shopping Centre site subject to conditions in conflict with the long established Urban Design Framework for the site which are not supported by the Council or local community and prompting the Mayor of Boroondara to declare at a council meeting on 30 January 2006 that the Minister ‘had a reputation as a bovver boy and for riding roughshod over this Council’ and was demonstrating a ‘contempt for local government, for Victorian Communities and for democracy’.

GENERAL BUSINESS

NOTICES OF MOTION

Earlier notices appear in the consolidated version of this notice paper, available online at www.parliament.vic.gov.au [Legislative Assembly — Documents — Chamber Documents — Notice Papers].

NOTICES GIVEN ON 9 FEBRUARY 2006

- 516 **MR BAILLIEU** — To move, That this House condemns the Treasurer and the part-time Minister for Planning for their limp response to the final report of the Victorian Competition and Efficiency Commission entitled ‘Regulation and Regional Victoria: Challenges and Opportunities’ and in particular their failure to articulate a coherent plan to overcome the shortcomings of the Government’s bungled Net Gain or Native Vegetation controls which, following a precedent-setting Victorian Civil and Administrative Tribunal hearing in regard to a Bendigo property have led the Managing Director of Villawood Properties to tell the *Bendigo Advertiser* on 24 January 2006: ‘We have been ordered to provide the Council with the exact same amount of land that we plan to develop despite the fact that we intend to retain much of the vegetation’.
- 517 **DR NAPHTHINE** — To move, That the Minister for Agriculture personally visit the proposed new Ballarat saleyards site at Learmonth and meet with all stakeholders, including local residents, to ensure that these important regional saleyards are built in the most appropriate location to meet the long term needs of Victorian agriculture.

- 518 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for his continuing failure to recognise the anxiety and concern in rural communities over his attempt to unilaterally impose new rural zones without local community support, the loss of value such direct translation may cause and the failure to respond to councils' concerns prompting South Gippsland councillor David Lewis to comment to the *Star* newspaper recently that 'No progress has been made as far as I am aware since the public meeting in Leongatha months ago'.
- 519 **DR NAPTHINE** — To move, That this House urges both the Minister for Planning and the Minister for Water to meet with local residents of Learmonth to listen to their views on the proposed relocation of the Ballarat saleyards to Learmonth.
- 520 **MR DELAHUNTY** (*Lowan*) — To move, That this House recognises that education and training are vital to the continuing development of our country students and, with increasing petrol prices and the long distances our country students travel, it supports that the school bus conveyance allowance for country students be linked to the Consumer Price Index and be back-dated to 2003.
- 521 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for providing a total of only \$150,000 funding for all rural councils to undertake strategic studies to consider implementation of new rural zones when, in regard to the implementation of the flawed Melbourne 2030 Strategy, the Government gave the equivalent to each metropolitan council.
- 522 **DR NAPTHINE** — To move, That this House urges the Minister for Water to conduct the necessary investigations and research to ensure the proposed Ballarat Livestock Selling Centre and abattoir for Learmonth will not adversely affect the Ascot Groundwater Management Area and the local wetland environment.
- 523 **MR PLOWMAN** — To move, That the extraordinary circumstances that occurred on the train trip from Wodonga to Melbourne on 23 January 2006 and then on the return trip from Melbourne to Wodonga on 25 January 2006 are never repeated and that the Minister for Transport reviews all the issues that led to an elderly woman with two young children having to suffer extremely debilitating conditions on these two trips and ensures that these circumstances can never be repeated.
- 524 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for his failure to recognise that his flawed, unfunded, unloved and increasingly unworkable Melbourne 2030 strategy has enraged local communities and even prompted the former head of Planning at the Melbourne Metropolitan Board of Works Mr Geoff Harris who was himself responsible for the development of Melbourne's original green wedges policy to declare at a public meeting on 1 February 2006 that 'Melbourne 2030 stinks'.
- 525 **DR NAPTHINE** — To move, That this condemns the Member for Ripon for failing in his basic duty as a local member in that he refuses to meet with concerned residents of Learmonth to discuss the proposed construction of an abattoir, agribusiness centre and the relocated Ballarat saleyards in their community.
- 526 **MR BAILLIEU** — To move, That this House calls on the part-time Minister for Planning to immediately conduct an independent, comprehensive and public review of his flawed, unfunded, unloved and increasingly unworkable Melbourne 2030 strategy and notes in so doing that the president of Save Our Suburbs, Ian Quick, called in the *Melbourne Times* of 1 February 2006 for Melbourne 2030 to be 'completely revisited'.

- 527 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for the string of incompetent interventions in the so called Buttigieg case in Melton which have led, despite two ministerial call-ins both of which have been deemed by the Victorian Civil and Administrative Tribunal to have been unlawful and unprecedented retrospective changes to law being rushed through Parliament, to the prospect of an unwanted and inappropriately located broiler farm being located in green wedge land close to homes and all because the Government refuses to recognise the failings of its flawed, unfunded, unloved and increasingly unworkable Melbourne 2030 strategy.
- 528 **MR BAILLIEU** — To move, That this House calls on the Treasurer and Minister for Consumer Affairs to carefully consider the submission of the Australian Federation of Travel Agents (AFTA) lodged in August 2005 with the Standing Committee of Consumer Affairs in regard to regulatory practices and in particular to respond to the concerns of AFTA that a proposal for exemptions which would allow Australia Post to contract with Jetstar may lead to unfair competitive advantages being afforded to Australia Post over the interests of thousands of small business operators and may contravene National Competition Policy.
- 529 ***MR BAILLIEU** — To move, That this House condemns the Member for Mitcham and other Bracks Government advisors for their proposal to ban kerbside parking in Melbourne which has led to comments from my constituents such as: ‘Small business cannot survive without kerbside parking. We are reliant on cars for transport and MUST have parking facilities.’ and also: So, what do I think of a ban on kerbside parking? Clearly Tony Robinson lives in ‘the bush’ and works from home!’.

NOTICES GIVEN ON 2 MARCH 2006

- 529 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for his repeated hypocrisy in exempting Government agencies from the provisions of the Government's own native vegetation controls as required in clause 52.17 of the Victorian Planning Provisions which has been most recently demonstrated in exemptions granted by the gazetting of Amendment C63 to the Greater Shepparton Planning Scheme, Amendment C34 to the Latrobe Planning Scheme and Amendment C20 to the Strathbogie Planning Scheme.
- 530 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to prevent his Melbourne 2030 Planning Strategy from supporting development which is clearly regarded as inappropriate by local communities such as the application for a high rise

- 531 **MR DELAHUNTY** (*Lowan*) — To move, That this House condemns the city-centric Bracks Government for removing the highly effective and widely supported 1080 carrots from Victoria's rabbit baiting program and denying land holders, landcare groups and farmers the best tool for rabbit control.
- 532 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for his approval of a substantial high rise development in Smith Street, Collingwood against the wishes of the local community and for the flawed Priority Development Panel processes which preceded the approval.

- 534 **MR DELAHUNTY** (*Lowan*) — To move, That this House supports the construction of a new police residence in the town of Branxholme in the Lowan electorate and recognises this will assist in recruiting a permanent officer and remove the concerns of residents who have signed a petition in support of a permanent police officer in Branxholme.
- 535 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for his continuing unilateral program of direct translation of new rural zones, without notification to landlords, which continues to lead to loss of land value to many unsuspecting land owners and which prompted the *Weekly Times* on 1 March 2006 to report "Home Zone Row divides Country".
- 536 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to amend his flawed guidelines for wind energy facilities which have been used by the applicants for the McArthur wind farm in conduct of Panel hearings to bully neighbours and to claim that the legitimate and real concerns of those neighbours should be ignored by the Panel because they are not specifically referred to in the guidelines when those guidelines are widely acknowledged to be inadequate with that inadequacy being a significant reason in the resignation of the original Panel Chairman who had been co-author of the guidelines.

NOTICES GIVEN ON 28 MARCH 2006

- 538 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for his unilateral implementation of new rural zones which has led to loss of land value for many land owners and in particular to a 59 year old Portarlington widow having her Centrelink widows pension being rejected because of an asset reassessment of her property which she can now not realise and leading her to say in an article by Lauren Pike quoted in *Geelong Info* on 12 March 2006, that the new zones would ‘destroy the livelihood of many people across the State’ and ‘It’s an absolute nightmare. And I would tell all people affected by these new zones to rattle as many cages as you can before it is too late’.
- 539 **MR ROBINSON** — To move, That this House notes the Federal Trade Minister’s recent announcement that the Iraqi Government will accept continued Australian wheat export subject to certain technical conditions, and calls on the Minister to honestly state that those conditions require the abandonment of the single desk system which has been so recklessly abused by AWB Ltd.
- 540 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning and the Member for Gisborne for failing to attend a packed public meeting at Woodend on 14 March 2006 called by local land owners to discuss the Minister’s disastrous and unilateral implementation of new rural zones which had led to substantial loss of land value for many land owners.
- 541 **MR ROBINSON** — To move, That this House congratulates University of Melbourne polymer nanotechnologist, Professor Frank Caruso, for his recent success in being awarded the Royal Australian Chemical Institute’s Australian Polymer Science and Technology Achievement Award, noting the outstanding work undertaken by Professor Caruso in his role as Director of the University’s Centre for Nanoscience and Nanotechnology.

NOTICES OF MOTION

Earlier notices appear in the consolidated version of this notice paper, available online at www.parliament.vic.gov.au [Legislative Assembly — Documents — Chamber Documents — Notice Papers].

NOTICES GIVEN ON 30 MARCH 2006

- 529 **DR NAPHTHINE** — To move, That this House urges the Bracks Labor Government to immediately lift its stupid, anti-tourist, anti-Victorian and union-inspired restriction on trading on Easter Sunday.
- 530 **MRS SHARDEY** — To move, That this House supports the Liberal Party's request to the Federal Government to allocate at least 150 medical school places in Victoria and also supports the allocation of some of these places to rural Victoria through supporting proposals like Deakin University establishing the first rural and regional medical school in southern Australia.
- 531 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to notify or consult land owners in the course of the bungled introduction of new rural zones.
- 532 **DR NAPHTHINE** — To move, That this House notes with concern the significant negative impact of the Government's ban on Easter Sunday trading on tourism, jobs and the economy of rural and regional Victoria.
- 533 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for the flawed Broiler Farm Code which has led to inappropriate applications such as the multiple application and approval on 24 February 2006 by the Victorian Civil and Administrative Tribunal of five separate but linked broiler farms in Lethbridge when the location of those broiler farms was inconsistent with the Government funded planning study undertaken by Golden Plains Shire to identify suitable land and which has led to abutting Lethbridge residents

facing considerable loss of amenity and the town of Lethbridge having reduced capacity for residential growth.

- 534 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to prevent the Melbourne 2030 Planning Strategy from supporting development which is clearly regarded as inappropriate by local communities such as the proposal for a supermarket, shops and apartments development in Sorrento on the Mornington Peninsula in which virtually exclusive access is to be provided to a car park, the construction of which had been partially funded by the contribution of approximately \$1 million by some 100 local traders and which contradicts the local Design and Development Overlay and the Sorrento Historic Planning Policy 22.17.
- 535 **DR NAPHTHINE** — To move, That this House calls upon the city-centric Bracks Labor Government to understand the importance of tourism to the south west coast and urges the Government to immediately exempt all areas of the south west coast from the short-sighted, anti-tourism, anti-business and anti-country Victorian ban on Easter Sunday trading.
- 536 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for the flawed guidelines for the location of wind energy facilities which have led to lawyers for the proponents of the McArthur wind farm admitting in their reply to the Panel that ‘some objectors argued that the wind energy guidelines have an inherent bias in favour of wind farms. The proponent agrees’.
- 537 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning and the Member for Narracan for the flawed Broiler Farm Code which has led to the unilateral approval of inappropriately sited broiler farms such as that recently approved by Victorian Civil and Administrative Tribunal at Drouin against the very strong objection of the local community and the Shire of Baw Baw.
- 538 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to prevent Ascot Vale residents from being grossly misled by the proponents of the Government’s redevelopment of the Melbourne Showgrounds as to the impact of the development on traffic in local streets and in particular the massive escalation of the location, size and proposed uses of Gate 6 on Langs Road now earmarked for heavy vehicle access contrary to the explicit undertakings previously given to residents and for failing to respond to correspondence from affected residents.
- 539 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to address the serious outbreak of phytophthora fungus at the site of the Kew Residential Services development, for claiming he was unaware of the outbreak when the Government has been in possession for some time of a consultant report on the problem and for failing to respond to correspondence on the subject from the Kew Cottages Coalition when that fungus has already been responsible for the recent and rapid death of mature and rare trees on site and is capable of spreading to surrounding vegetation and parks.
- 540 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning and the Member for Bayswater for failing to prevent the loss of public open space at 54 Kingloch Parade, Wantirna now to be converted to housing.

NOTICES OF MOTION

Earlier notices appear in the consolidated version of this notice paper, available online at www.parliament.vic.gov.au [Legislative Assembly — Documents — Chamber Documents — Notice Papers].

NOTICES GIVEN ON 4 APRIL 2006

- 537 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for once again threatening the Boroondara Council when in a letter dated 29 March 2006 the Minister demanded that the Council exhibit a planning scheme amendment for the proposed redevelopment of the Tooronga Village Site in accordance with the Minister's conditions and gave the Council until 5 April 2006 to agree or he would call in the project when the Council, in keeping with the Urban Design Framework agreed in 2001 for the site, deemed the Minister's conditions to be inappropriate.
- 538 **MR SEITZ** — To move, That this House condemns the Howard Government for not providing funds towards the upgrading of the Calder Highway and the construction of interchanges at Kings Road, Calder Park Drive and Sunshine Avenue, changes which are desperately needed for the safety of the community, as the Calder Highway is a Commonwealth national highway.
- 539 **MR DIXON** — To move, That this House condemns the Minister for Education and Training for not responding to a letter dated 7 December 2005 from Mr Clinton Tilley regarding the Victorian College for the Deaf and not calling back some 2,028 hours later when Mr Tilley was promised a response within 24 hours.
- 540 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for further delaying a decision on the new bridge connection between Barwon Heads and Ocean

Grove by calling in the issue and establishing yet another advisory panel and then ruling out consideration of the locally supported so-called 'third option' on the grounds that the third option would cross the local wetlands, when all options will cross those same wetlands.

- 541 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to prevent the Melbourne 2030 planning strategy from supporting development which is clearly regarded as inappropriate by local communities such as the proposal for a seven storey supermarket, retail, office and apartment block at Burke Avenue in Camberwell which is not consistent with community expectations generated by the 1993 Camberwell Junction Structure Plan, the existing two storey permits on the site currently under construction, and the Municipal Strategic Statement and undermines the work of the current but incomplete Camberwell Junction Structure Plan Review Group.

- 543 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to recognise the conflict of interest overshadowing the Minister's role as the ultimate ministerial authority for the architectural heritage associated with proposals to demolish the original Federal Court building in Melbourne when as Attorney-General the Minister is at the same time the principal advocate for the proposal to redevelop the Court precinct and calls on the Minister to publicly declare how the Minister intends to manage this conflict.
- 544 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to adequately address the legitimate concerns of the Power Line Action Group, Portland and in particular for failing to ensure that the developers of the Portland Wind Energy Project adhere to the requirements of the Government's guidelines for wind energy facilities to use underground cabling where possible, leading the Chairman of the Action Group in a letter to the Minister to declare that 'residents are being bullied, hoodwinked and given unacceptable choice [and] ... need protection from this form of unacceptable behaviour by a large public company'.

NOTICES GIVEN ON 6 APRIL 2006

- 538 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for privately advising the City of Manningham to ignore the panel report prepared in response to proposed Planning Scheme Amendment No C50 to the City of Manningham Planning Scheme and for undermining the members of Panels Victoria in particular Megan Carew, the Chair of the C50 Panel, and other C50 Panel members Alison Glynn and Stephen Sully.
- 539 **MR RYAN** — To move, That this House notes with grave concern the parlous position of the orange-bellied parrot and the threats to their numbers posed by industrial development such as the proposed Bald Hills wind farm and calls upon the Victorian Government to work cooperatively with the Federal Environment Minister, the Honourable Ian Campbell, to ensure that appropriate plans are developed to guarantee the preservation of this rare threatened Australian species.
- 540 **MR BAILLIEU** — To move, That this House expresses its wholehearted support for the Australian Football League's (AFL) drug testing policy and in particular its strong stand on out of competition testing and for its commitment to testing for illicit drugs as well as performance enhancing drugs and applauds the AFL Players Association and the players themselves for committing to the associated protocols and for their collective commitment to real cultural change.
- 541 **MR DIXON** — To move, That this House condemns the Minister for Water for alleging on 5 April 2006 that the Federal Government has rejected funding for a water recycling project on the Mornington Peninsula when the truth is that unlike any other state or any other eligible project in Victoria, this Minister refuses to fund 50 per cent of the project's cost as set out in the National Water Commission funding guidelines.
- 542 **MRS POWELL** — To move, That this House condemns the Minister for Housing for failing to provide adequate public housing in the Shepparton district, failing to properly maintain public

- 543 **MRS SHARDEY** — To move, That this House congratulates the Howard Government for its announcement of \$1.8 billion to be spent on mental health and calls upon the State Minister for Health to announce immediately how much the Bracks Government is prepared to spend or commit by way of matched funding.

- 545 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning and the Labor Member for Templestowe Province in another place, the Honourable Lidia Argondizzo, MLC for failing to recognise that the flawed Melbourne 2030 policy is actually inhibiting development of Doncaster Hill by providing no flexibility for land holders to upgrade their land and leading to negative valuations of some holdings and substantial losses.
- 546 **MR COOPER** — To move, That this House — (a) condemns the Attorney-General for failing to keep the Minister's unequivocal commitment to the Victorian public to produce travel diaries from the Minister's time as the Federal Member for Kennedy to substantiate the claim that all of the travel carried out at the expense of the Australian taxpayers during that time was on legitimate parliamentary business; (b) condemns the Attorney-General for abrogating the oath as a Minister of the Crown by refusing to fully cooperate with a federal police investigation into this matter; and (c) calls upon the Attorney-General to produce those travel diaries immediately for scrutiny, and if the Minister fails to do so to admit that the Minister does not possess them and make immediate arrangements to refund the entire costs of the travel in question to the Commonwealth Parliament.

NOTICES GIVEN ON 2 MAY 2006

- 539 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for embarking on an expensive political stunt in taking the Federal Government to court over its Bald Hills decision when the power and responsibility exercised by the Federal Minister is enshrined in the Environment Protection and Biodiversity Conservation Act 1999 (Cth) and is a power equivalent to that exercised by the Victorian Minister when a permit was called in and approved for the Hilton and Jolimont projects and the exercise of that power was upheld in the courts in each case.
- 540 **MS CAMPBELL** — To move, That this House condemns Queensland Nationals Senator Barnaby Joyce for his short-sightedness, his avarice and his total lack of understanding of our place in the ecosystem and environment, shown in his calls for mining in Antarctica, this pristine wilderness, the only true wilderness left on our planet and which should be protected.

- 541 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for the unilateral call-in of the Tooronga redevelopment project against the wishes of the local community and the City of Boroondara prompting the Mayor of Boroondara to write in a letter to the Minister dated 5 April 2006 stating that due process had been ‘thwarted’ and that claiming the call-in was a matter of State significance was ‘drawing a long bow’.
- 542 **MR SEITZ** — To move, That this House condemns the Liberal Federal Government for contemplating selling off Medibank Private thereby reducing the competition in this market leaving it open for private enterprise to put up health insurance as high as they like as there would be no fair comparison and competition from the Government.
- 543 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for his hypocrisy in ruling out developer-led planning scheme amendments after having called in and approved exhibition of a developer-led planning scheme amendment at Tooronga.
- 544 **MS CAMPBELL** — To move, That this House condemns the Federal Minister for Families, Community Services and Indigenous Affairs, The Hon Mal Brough MP for his sanctimonious, high-handed attitude to interventionist and draconian changes to welfare payments where his direct debit proposal demonstrates how he, and the Howard Government, would rather give people a hand out than a hand up and neither address the roots of societal problems, nor treat people with basic dignity.

NOTICES OF MOTION

Earlier notices appear in the consolidated version of this notice paper, available online at www.parliament.vic.gov.au [Legislative Assembly — Documents — Chamber Documents — Notice Papers].

NOTICES GIVEN ON 3 MAY 2006

- 537 **MR ROBINSON** — To move, That this House condemns Australian Foreign Minister Hon Alexander Downer MP for the Minister's recently published criticism of former Australian Prime Minister Hon John Curtin, noting that Curtin's outstanding leadership of the Australian Labor Party and the nation over a 10 year period in extremely demanding circumstances was immeasurably superior to the Minister's forgettable eight month leadership of the Liberal Party, and encourages the Minister to devote any future free time to reading briefings and cables — as taxpayers expect him to — rather than attempting to rewrite history in such a shabby and self-indulgent manner.
- 538 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for the limpness of the coastal spaces initiative which, despite six years of gestation and repeated announcements, led former editor Daryl McLure in the *Geelong Advertiser* of 22 April 2006 to say the announcement 'has been almost universally condemned as confusing, ambiguous and unworkable'.
- 539 **MR SEITZ** — To move, That this House condemns the Liberal Party for not supporting the people of Victoria against the Federal Government's injustice of not providing enough medical school placements in Victoria.

- 540 **MR DIXON** — To move, That this House congratulates the Australian Education Union on their condemnation of the Government for its poor record in funding and supporting education in this State.
- 541 **MR MILDENHALL** — To move, That this House congratulates the Premier and the Minister for Education and Training for their commitment to students and families which has seen the announcement this week of the lowest average government primary school class sizes since records began over 30 years ago.
- 542 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for his failure to support the views of the Members for Geelong and Lara who have opposed the proposed Yarra Street skybridge at Geelong and for instead describing the proposal in the Minister's much self-publicised ministerial intervention as having only some 'issues with the design'.
- 543 **MR ROBINSON** — To move, That this House congratulates the continuing excellent work of the Whitehorse Community Health Service, noting the outstanding reduction in the general dental waiting list from 5,885 to 1,903 in the past two years as a result of the Government's funding of 10 dental chairs, as well as the successful Heart Week 2006 campaign, which is assisting residents of Eastbridge Estate in Nunawading to gain increased mobility in the community.
- 544 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to approve the interim structure plan for Mornington put forward in 2005 by the Mornington Peninsula Shire Council.
- 545 **MR MILDENHALL** — To move, That this House congratulates the Minister for Housing on the occasion of the recent rebuilding of the 543rd public housing dwelling in the Braybrook Maidstone area.
- 546 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for the unilateral call-in of projects such as Tooronga Village which prompted the chief executive officer of the Victorian Local Government Association to say in an article in the *Progress Leader* dated 25 April 2006 'simply ripping the dispute from the hands of the local community is going to cause long-term damage and resentment'.

- 539 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for the flawed and confusing Broiler Farm Code which has led most recently to yet another bizarre ministerial call-in of a broiler farm application in Baw Baw Shire, a call-in the legality of which is once again being tested in the Victorian Civil and Administrative Tribunal and which prompted the Victorian Farmers Federation Chicken Meat Group President John Clarke to comment in an article in the *Weekly Times* on 26 April 2006 that ‘this demonstrates that the code is not worth the paper it’s written on’.

NOTICES GIVEN ON 30 MAY 2006

- 532 **MR ROBINSON** — To move, That this House expresses its opposition to the Federal Government's proposal to force asylum seekers, including children, to be transported to and processed in Nauru, and encourages the new Leader of the Victorian Liberal Party to convey his reported opposition to the policy in the strongest possible terms to the Prime Minister.
- 533 **MR SAVAGE** — To move, That this House calls on the Victorian Government to recognise the overwhelming opposition to the sale of Snowy Hydro Limited shown in the results of recent radio phone polls on *ABC Gippsland* which had 160 calls in 20 minutes with not one single phone call supporting the sale, and in New South Wales *Alan Jones 2GB* morning show received over 28,000 calls and only 208 were in favour.
- 534 **MR SEITZ** — To move, That this House condemns the Liberal Federal Government and the Federal Treasurer Hon Peter Costello for not providing funds to Victoria for the Calder Highway safety improvements when there is \$250 million from the Scoresby Freeway which should have been allocated to the Calder Freeway to improve the safety of the area which is desperately needed.

- 536 **MR ROBINSON** — To move, That this House congratulates Federal Liberal Member of Parliament Jackie Kelly for her recent comment that Labor's commitment to spend \$200 million on the construction of 260 new childcare centres in primary schools, many of these in Victoria, showed Labor was taking the issue more seriously than her own party, and further commends her for her earlier assessment of Federal childcare policies as a shambles.

GENERAL BUSINESS

NOTICES OF MOTION

Earlier notices appear in the consolidated version of this notice paper, available online at www.parliament.vic.gov.au [Legislative Assembly — Documents — Chamber Documents — Notice Papers].

NOTICES GIVEN ON 31 MAY 2006

- 535 **MR DIXON** — To move, That this House condemns the Minister for Education and Training and the Member for Hastings for failing to purchase land adjacent to the Somerville Campus of Mt Erin Secondary College thereby denying the school a once-off opportunity to provide more adequate playing space for their increasing student numbers.
- 536 **MR SEITZ** — To move, That this House condemns the Federal Minister for Education for not providing funding to TAFE institutions to be able to provide skills training for apprentices, as there is a skills shortage within the western suburbs, and therefore fostering the program that is exploiting the Chinese guest workers in Australia where, in some cases, the workers never receive the money that is paid and it is siphoned off by middle men and agencies.
- 537 **MR MAUGHAN** — To move, That the Bracks Labor Government be condemned for its totally irresponsible failure to deal with the spread of noxious weeds in this State and be called upon to considerably increase the amount of funding so that it can effectively control the spread of weeds which are now out of control in the one third of the State essentially controlled by the Crown, and to assist landowners, Landcare groups, catchment management authorities and others to control, and where possible eliminate, the spread of weeds on private land and roadsides.
- 538 **MS ECKSTEIN** — To move, That this House congratulates the Bracks Government and, in particular, the Minister for Children for providing \$76,954 in capital grants to three childcare

centres, 13 preschools and two outside school hours care programs in the electorate of Ferntree Gully to boost safety, buy equipment and improve the general amenities of these facilities.

- 539 **MR THOMPSON** — To move, That this House condemns the State Government for the detrimental impact of its failed Melbourne 2030 planning policy on the City of Bayside, in particular for — (a) its failure to consult properly with the Bayside community prior to the implementation of the policy in 2002; (b) allowance of inappropriate development that is out of character with the municipality, occurring largely against the desires of its residents and irrevocably changing the character of the City of Bayside; (c) the improper and excessive use of call-in powers by the Minister for Planning; (d) its failure to listen properly to Council as a legitimate voice of the community and failure to fully support Council or fund Council in the work required to process planning applications; and (e) a failure to adequately fund transport, human services and infrastructure requirements associated with the massively increased density planned in 2030; and calls on the Government to open the metropolitan planning process to Victorians and prevent further unrestrained damage to our urban environment.
- 540 **MR SEITZ** — To move, That this House condemns the Liberal Federal Government for neglecting the people in the western suburbs and not providing proper general practitioner services that the Howard Government promised at the last election in conjunction with the Sunshine Campus of Western Health in Furlong Road, as there is no general practitioner service that can viably survive and provide a 24-hour service for the people of the outer west of Melbourne.
- 541 **MR MAUGHAN** — To move, That the Bracks Labor Government be censured for its callous and uncaring disregard for the 30 unfunded community houses and learning centres which, in spite of doing great work in the community, receive no government funding at all towards the cost of a part time coordinator or for public liability insurance, and which rely on the goodwill of volunteers to keep operating, because this Government has been unable to develop an eligibility assessment process, since the last one was abandoned in 1999.

NOTICES GIVEN ON 1 JUNE 2006

- 537 **MR WELLS** — To move, That this House condemns the State Government for the detrimental impact of its failed Melbourne 2030 planning policy on the City of Knox, in particular for — (a) its failure to consult properly with the Knox community prior to the implementation of the policy in 2002; (b) allowance of inappropriate development that is out of character with the municipality, occurring largely against the desires of its residents and irrevocably changing the character of the City of Knox; (c) its failure to listen properly to Council as a legitimate voice of the community and failure to fully support Council or fund Council in the work required to process planning applications; (d) the improper and excessive use of call-in powers by the Minister for Planning across metropolitan Melbourne; (e) a failure to adequately fund transport, human services and infrastructure requirements associated with the massively increased density planned in 2030; and calls on the Government to open the metropolitan planning process to Victorians and prevent further unrestrained damage to our urban environment.
- 538 **MR SEITZ** — To move, That, noting that if Australia is to maintain its current living standards, it is the responsibility of the Government to provide an educated community and society, this House condemns the Federal Treasurer for — (a) lifting loan caps for students, which is detrimental to the western suburbs; and (b) not providing extra funding, particularly to Victoria University in the western suburbs, for the community to be able to continue their tertiary studies.
- 539 **MR THOMPSON** — To move, That this House condemns the Bracks Government for failing to curb greenhouse emissions on Melbourne's road system owing to the extraordinary delays and build up of traffic on the metropolitan road system and for failing to provide suitable public train alternatives adversely affecting Melbourne's environment and jeopardising its reputation as the most liveable city in the world.
- 540 **MR ROBINSON** — To move, That this House commends the extraordinary contribution of 91 year old Professor Frank Fenner to the international fight against polio, noting his outstanding work with the World Health Organisation over many years and his continuing work at the Australian National University's John Curtin School of Medical Research.
- 541 **MR MAUGHAN** — To move, That the Government be condemned for its failure to facilitate the deepening of sections of shipping channels which serve the Port of Melbourne and thus disadvantaging exporters by precluding container vessels to load to their full capacity, and its hypocrisy in touting this project as one of the most important and ambitious projects ever

planned to maintain the viability of the Port of Melbourne and in claiming that the Government is committed to this project as a priority State project, and then doing nothing to facilitate the project.

- 542 **MR SEITZ** — To move, That this House condemns the Federal Health Minister for only providing 400 extra medical places in Australia when Victoria alone needs 240 extra medical places to maintain the standard of medical service in Victoria and further condemns the Federal Minister for Health for failure in his portfolio of care for the community's health and wellbeing.
- 543 **MR THOMPSON** — To move, That this House calls on the Government to — (a) publicly release all the secret submissions on Melbourne 2030 that have been hidden from the Victorian community since 2002; (b) withdraw the ministerial directions which give priority to Melbourne 2030; and (c) place a moratorium on Melbourne 2030 as a reference document pending the development of a new metropolitan growth strategy.

- 546 **DR NAPHTHINE** — To move, That this House notes comments by the Treasurer in 1994, 1999, 2002 and 2003 that interstate migration statistics provide a strong indicator of the performance of the State Government and further notes that recently released Australian Bureau of Statistics data shows that during 2005 Victoria had negative interstate migration with a net 2,900 Victorians leaving for other states and territories.

NOTICES GIVEN ON 13 JUNE 2006

- 547 **MR DIXON** — To move, That this House condemns the Minister for Education and Training for not answering letters from Mr Clinton Tilley regarding the Victorian School for the Deaf written on 7 December 2005 and re-written on 29 March 2006, and a letter written by the Member for Nepean in May 2006 and, despite the promise of a return telephone call within 24 hours on 28 February 2006, having still not made that call some 2,496 hours later.
- 548 **MS GREEN** — To move, That this House expresses its grave concern at moves by the Prime Minister to announce an inquiry into nuclear energy in Australia, and calls on the Prime Minister to respect the laws of Victoria and rule out a nuclear power station anywhere in the State.
- 549 **MR DIXON** — To move, That this House condemns the Minister for Education and Training for not allowing the purchase of 6000 square metres of land adjacent to the Somerville Campus of Mount Erin Secondary College even though the original owners gave the first offer to the Government, the Federal Government have guaranteed the funding and the new owners are offering the land again for sale to the Government.

- 550 **MS ECKSTEIN** — To move, That this House congratulates the Bracks Government and, in particular, the Minister for Transport for providing \$617,000 for the installation of traffic signals at the corner of Station Street and Burwood Highway in the electorate of Ferntree Gully, noting that this will significantly improve road safety for the residents of Ferntree Gully exiting Station Street onto Burwood Highway.
- 551 **MR THOMPSON** — To move, That this House pays tribute to Guus Hiddink and the members of the Australian soccer team in acknowledgement of the historic fighting 3/1 victory over Japan in the 2006 World Cup game.
- 552 **MR ROBINSON** — To move, That this House expresses its continuing condemnation of the Federal Government's draconian industrial relations laws and their impact on Victorian workers and families, noting in particular — (a) the recent determination by the Office of Workplace Services that the March 2006 sacking and rehiring of Corowa meat workers at a loss of up to \$180 per week in wages was permissible; (b) survey findings by employment advocate Peter McIllwain that since March 2006 more than 60 per cent of Australian Workplace Agreements (AWAs) have scrubbed leave loading, and 63 per cent have wiped out penalty rates; (c) findings by Mr McIllwain that 20 per cent of the new AWAs give no pay rise at all; (d) Senate estimates evidence by Senator Eric Abetz that safety training provided by unions is expressly prohibited by the new laws, in direct contradiction of assurances given by the Prime Minister that this vital entitlement would continue; and (e) the appalling use of the new laws by fabric retailer Spotlight to force employees to accept onerous new working conditions in exchange for a pitiful two cents per hour pay increase, and calls on members of parliament from the Liberal Party and The Nationals to urge their federal colleagues to repeal this miserable and inequitable legislation.
- 553 **MR DIXON** — To move, That this House condemns the Member for Hastings for not working to secure the purchase of land adjacent to the Somerville Campus of Mount Erin Secondary College by claiming the presence of aboriginal artefacts, while not producing any evidence of such.

NOTICES GIVEN ON 14 JUNE 2006

- 552 **MRS SHARDEY** — To move, That this House calls on the Premier to investigate the statements by Labor candidate for the Western Metropolitan Region of the Legislative Council, Mr Khalil Eideh pledging his support for Syrian dictator Bashar al-Assad and indicating support for warriors ‘in Southern Lebanon and Palestine’, a reference to Hezbollah and possibly Hamas, and asks the Premier to be honest with the Victorian community about the Labor Party’s support for this candidate and the risks to community harmony that Mr Eideh’s statements pose, and finally, if Mr Eideh is found to have been the author of the statements attributed to him, to strip him of his pre-selection.
- 553 **MR ROBINSON** — To move, That this House congratulates Mr Mark Shackleton from Melbourne’s Walter and Eliza Hall Institute for his groundbreaking research into breast tissue

stem cells, and his very deserved success as the 2006 winner of the Premier's Award for medical research.

- 554 **MRS SHARDEY** — To move, That this House condemns the State Government for the detrimental impact of its failed Melbourne 2030 planning policy on the City of Glen Eira, in particular for — (a) its failure to consult properly with the Glen Eira community prior to the implementation of the policy in 2002; (b) allowance of inappropriate development that is out of character with the municipality, occurring largely against the desires of its residents and irrevocably changing the character of the City of Glen Eira; (c) its failure to listen properly to Council as a legitimate voice of the community and failure to fully support Council or fund Council in the work required to process planning applications; (d) the improper and excessive use of call-in powers by the Minister for Planning across metropolitan Melbourne; (e) a failure to adequately fund transport, human services and infrastructure requirements associated with the massively increased density planned in 2030; and calls on the Government to open the metropolitan planning process to Victorians and prevent further unrestrained damage to our urban environment.
- 555 **MS BUCHANAN** — To move, That this House condemns the shadow education spokesperson, the member for Nepean, for his baseless claims that the Federal Government was willing unconditionally to purchase extra surplus land in Somerville for the junior campus, at no cost to the State, noting also the comments of the current landowner who feels he is being used for nothing more than Liberal party political point scoring, and who just wants to get on with the job of building some urgently needed retirement units for the senior citizens in the Somerville community.

GENERAL BUSINESS

NOTICES OF MOTION

NOTICES RENEWED ON 27 OCTOBER 2005

- 1 **MR BAILLIEU** — To move, That this house condemns the Minister for Planning for — (a) failing to consult Victorian communities, in particular Victorian coastal communities, in regard to the establishment of guidelines for the development of wind energy facilities; and (b) failing to adequately protect sensitive areas of Victoria's precious coastline from the adverse impact of wind energy facilities.
- 2 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Education and Training for alienating and then allowing the complete development and destruction of community parkland in Malleehen Street, Werribee when this park has for more than 20 years been maintained as parkland including a playground and has provided the only safe and easily accessible public open space for neighbourhood children.
- 3 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for authorising the complete destruction and re-development of community parkland at the site of the former Karingal Park Secondary College in Frankston.
- 4 **MR BAILLIEU** — To move, That this House condemns the Minister for Education and Services and the Minister for Planning for failing to ensure the retention of public open space adjacent to the Irabina Special School in Kingloch Parade in Wantirna.
- 5 **MRS SHARDEY** — To move, That the Bracks Labor Government be condemned for its failure to stop chroming in Department of Human Services funded facilities and for giving tacit approval for chroming through its guidelines on inhalant use which state: 'it is important that

workers take into account the importance of social bonds and the sense of belonging derived from group activities, including when abusing inhalants in a group’.

- 6 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Environment for failing to prevent the unilateral destruction by Melbourne Water of some 200 mature trees at Pridmore Park in Hawthorn.
- 7 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Environment for failing to prevent the unilateral closure of a Yarra River walking track in Hawthorn and for failing to assist the City of Boroondara and local residents in working to have the walking track reopened.
- 8 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Education and Training for secretly initiating a proposed sale of land from Ashwood College in Burwood including a significant wetlands area, for the purpose of a housing development.
- 9 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for issuing, on 23 May 2003, without notice, consultation or explanation, a new ministerial order regarding home builders warranty insurance to exempt Government agencies through the Director of Housing from the Government’s own home builders warranty insurance requirements, but leaving private builders to suffer the burden of this rapidly failing and manifestly inadequate and inequitable system.
- 10 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to adequately monitor the impact and consequences of the Government’s home builders warranty insurance system on consumers and builders, in particular inadequate cover, inconsistent eligibility criteria, inequitable demands on builders, high premiums, non-recognition of previous performance, incapacity to tender, enormous time loss and administrative burden and aggregate work limits.
- 11 **MR PERTON** — To move, That this House condemns the Bracks Government for withholding vital maintenance funding from schools again this year, for cutting corners and for politicising the upkeep of school grounds and buildings in Victoria at the cost of certainty, community safety and the proper, efficient forward planning of the educational system, and for presiding over the destruction of a skills and competencies base surrounding the development of the Physical Resource Maintenance System in education, which must be restored.
- 12 **MR PERTON** — To move, That this House condemns the Bracks Government for its broken promise to spend \$50 million to fund the purchase of what were in its own words ‘urgently needed’ new relocatable classrooms for Victoria’s schools and for instead paying for expensive maintenance of seriously outdated portable classrooms which are constructed from asbestos and should be retired.
- 13 **MR BAILLIEU** — To move, That this House urges the Victorian Government to immediately alter its windfarm guidelines to ban windfarms from sensitive environmental and coastal locations.
- 14 **MR BAILLIEU** — To move, That this House warmly congratulates all those associated with the concept and production of the book *You Are Not Alone* by Sane Australia and, in particular, congratulates Dan Halloran, an extraordinary 15-year-old Victorian whose personal experience dealing with the mental illness of his mother Virginia, and the dedication of his father John,

inspired the book — a book which provides the chance for children with a parent or family member with a mental illness to understand and cope just as Dan and his father coped with not only Virginia's mental illness but also her tragic death from cancer last year, following a long problematic diagnosis and treatment regime, the truth of which still awaits resolution by the Minister for Health.

- 15 **MR PERTON** — To move, That this House condemns the Bracks Government for its continued failure to respond to Questions on Notice and be open and accountable for its acts.
- 16 **MR BAILLIEU** — To move, That this House gives its unequivocal support to the Australian Rugby Union in its campaign to overturn the proposed ban on the singing of *Waltzing Matilda* at the forthcoming World Cup and urges fans, in the great traditions of the song itself, to sing it anyway.
- 17 **MR BAILLIEU** — To move, That this House calls on the State Government to guarantee that the proposed development at Burnley Gardens not be called in.
- 18 **MRS SHARDEY** — To move, That this House calls on the Chair and other Government members of the all-party Family and Community Development Committee to stand up to the Premier's outrageous 'Guidelines for Submissions and Responses to Inquiries' that they are now required by the politburo Department of Premier and Cabinet to implement, and that these Government members come forward and detail to the House each occasion when independent departmental and statutory authority submissions and advice have been censored, edited or vetoed so as to compromise Government members' responsibilities to this Parliament's independent committee work.
- 19 **MR PERTON** — To move, That this House calls on the Chair and other Government members of the all-party Public Accounts and Estimates Committee to stand up to the Premier's outrageous 'Guidelines for Submissions and Responses to Inquiries' that they are now required by the politburo Department of Premier and Cabinet to implement, and that these Government members come forward and detail to the House each occasion when independent departmental and statutory authority submissions and advice have been censored, edited or vetoed so as to compromise Government members' responsibilities to this Parliament's independent committee work.
- 20 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to protect Melbourne's open space resources and undermining the amenity of that open space including at Royal Park, Jolimont, Kew Cottages, Burnley Gardens, Werribee, Frankston, Bayswater and the Yarra.
- 21 **MR BAILLIEU** — To move, That this House condemns the Minister for Transport and the Minister for Planning for their silence on the proposed closure of the Swanston Street entrance to Melbourne Central Train Station on the corner of La Trobe Street which will inconvenience thousands of public transport users, disrupt the popular train/tram interchange and force commuters to undertake a circuitous route through the Melbourne Central Shopping centre to access the station.
- 22 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for doing nothing to prevent the practice of Councils rejecting applications for in-ground swimming pools because of their clearly ludicrous and arbitrary contention that the excavation involved would contravene local covenants preventing quarry or mining in metropolitan Melbourne.

-
- 23 **MR PERTON** — To move, That this House condemns the Bracks Government for failing the students of Daylesford Primary School by deliberately setting a staffing budget for the school which will force the school to shed experienced staff and cut support programs for students and, further, that this House agrees with the School Council President, Colin Priest, that this is ‘deplorable for a Government that had education as a key election promise’ and ‘this funding crisis is having a negative effect on teacher and student morale’.
- 24 **MR PERTON** — To move, That this House condemns the Member for Ballarat East for failing the students of Daylesford Primary School by acquiescing to the Bracks Government staffing budget for the school which will force it to shed experienced staff and cut support programs for students and further condemns him for failing to defend the right to a good education in the state schools of Daylesford.
- 25 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Thomastown West Primary School by capriciously imposing a \$10,000 WorkCover penalty which will cause a reduction in the size of the teaching staff at the school and, further, that this House agrees with the School Council President, Lisa Courescas, that this Government should ‘rescind this unjust financial imposition on schools’.
- 26 **MR PERTON** — To move, That this House condemns the Member for Thomastown for failing the students of Thomastown West Primary School by acquiescing to the Government’s imposition of a \$10,000 WorkCover penalty and failing to stand up for the rights of the students and parents of Thomastown West Primary School.
- 27 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Lorne-Airey’s Inlet P-12 College by capriciously imposing a \$10,000 WorkCover penalty which will cause a reduction in the size of the teaching staff at the school and further, that this House expresses its support for the School Council President, Angus McKenzie, who has said, ‘this school council is disappointed and angry at the Government’s policy of devolving WorkCover premium to schools; we have already endured one bitter disappointment this year when the long awaited building project was not listed for master planning’.
- 28 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Daylesford Secondary College by capriciously imposing a WorkCover penalty which will cause a reduction in the size of the VCE teaching staff at the school and, further, that this House agrees with the Daylesford Secondary College School Council President, Barry Golding, and the Principal, Heather McIntyre, that ‘this policy is an indictment on those who wrote it and those who support it; in the end the losers are our students’.
- 29 **MR PERTON** — To move, That this House condemns the Member for Ballarat East for failing the students of Daylesford Secondary College by acquiescing to the Bracks Government staffing budget for the school which will force it to shed staff because of a WorkCover penalty imposed by the Minister for Education Services and further condemns him for failing to defend the right of children to a good education in the state school of Daylesford.
- 30 **MR PERTON** — To move, That this House dissents from the ruling of the Speaker on 19 November 2003 when she used Sessional Order 10 in an impulsive fashion and for her refusal to follow the ruling of Deputy Speaker McGrath recorded in the *Rulings from the Chair*, July 2003, at p 71 which reports as follows ‘the Deputy Speaker drew attention of the House to

his concern about continual requests for the withdrawal of words that have, in the past, been used regularly in the cut and thrust of debate. He pointed out that when members decide to take exception to words used in the House, they should be mindful that they do not paint themselves in a corner and so reduce the vocabulary that can be used that future debates will be inhibited and that common sense is needed' and instead for using the narrowest interpretation of parliamentary practice.

- 31 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for — (a) doing nothing to prevent the recent but repeated refusal of applications for in-ground swimming pools by VCAT, and the Cities of Glen Eira and Boroondara in particular, on the grounds that excavations for such pools would constitute 'quarrying' and hence be in conflict with old covenants preventing quarrying or mining in metropolitan Melbourne; and (b) forcing residents with applications to expend tens of thousands of dollars pursuing legally difficult applications for covenant removals despite in-ground pools existing in immediately adjacent homes.
- 32 **MR BAILLIEU** — To move, That this House congratulates the Australian Rugby Union for its exemplary conduct of the 2003 World Cup, Martin Johnson and the English team for their amazing last gasp victory, George Gregan and the Wallabies for their sensational efforts and all other teams, fans and volunteers for their high-spirited, good-hearted support of the heavenly game and this tournament in particular and urges the earliest possible inclusion of a Victorian team in the Super 12 competition, pending a return bout in 2007.
- 33 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Osborne Primary School by capriciously imposing a \$10,000 WorkCover penalty which will cause anxiety for the school and its management and further, that this House expresses its support for the School Council President of Osborne Primary School Mr Ric Bugg, who has said 'were the school to move to a significant WorkCover disincentive in the future, (potentially through no fault of our own), up to \$10,000 would not be available for the education of our children; we find this totally unacceptable'.
- 34 **MR PERTON** — To move, That this House condemns the Member for Western Port for failing the students of Osborne Primary School by acquiescing to the Government's imposition of a WorkCover penalty and failing to stand up for the rights of the students and parents of Osborne Primary School.
- 35 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Highvale Secondary College by capriciously imposing a \$10,000 WorkCover penalty which will cause anxiety for the school and its management insofar as they acknowledge that under this system 'anticipated savings can quickly turn into an actual loss as a result of a serious but unpreventable accident'; and (b) expresses its support for the College Council President, Mr Daryl Lynch, who says 'the Highvale Secondary College Council wishes to express in the strongest terms its opposition to the imposition of the partial transfer of responsibility for WorkCover to schools in 2004 and asks that this decision be reversed ...; the threat of this WorkCover disincentive arrangement will compromise schools keen to improve conditions through additional local fundraising, as well as creating considerable uncertainty in their budgeting for future expenditure ...'.
- 36 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for knowingly misleading the House when she said in debate on changes to the Urban Growth Boundary that public submissions made on the implementation of Melbourne 2030 were available on the Government website when they are not, and never have been.

- 37 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to provide any legal advice that submissions made on the implementation of Melbourne 2030 could not be made available because of the Privacy Act (as claimed at a briefing on changes to the Urban Growth Boundary) when the request for submissions specifically contemplated public release and legislation and standard practice provides that all submissions to panels are made public.
- 38 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Coburg West Primary School by capriciously imposing a \$10,000 WorkCover penalty and further, that this House notes the comment of the school council which states — ‘(a) our school has incurred a premium cost to the school of \$10,000 which will have a considerable impact on the education provided to the children; as this premium will be deducted from the staffing credit component in the school global budget the direct result is there will be less teaching time available; (b) we agree that schools should be prepared to accept responsibility for situations that they believe are within their sphere of management, but in many cases WorkCover liabilities are way beyond our control; and (c) at our school we take the responsibility of providing a safe workplace extremely seriously and have in place a rigorous process of safety inspections including the provision of professional development in voice care’.
- 39 **MR PERTON** — To move, That this House condemns the Member for Brunswick for failing the students of Coburg West Primary School by acquiescing to the Government’s imposition of a \$10,000 WorkCover penalty and failing to stand up for the rights of the students and parents of Coburg West Primary School.
- 40 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Traralgon South Primary School by capriciously imposing a \$2,900 WorkCover penalty which will cause great financial hardship to this small school community whose annual income through fundraising will be absorbed; and (b) expresses its support for the School Council President of Traralgon South Primary School Chris Madsen who commented ‘the school council believes that these changes unfairly impose a financial penalty on schools that ultimately penalises students at our school ... we also object to the proposed capping thresholds and methods of calculation; for our school the ‘penalty’ cap is set at \$2,900, yet the ‘incentive’ cap is a mere \$580’.
- 41 **MR PERTON** — To move, That this House condemns the Member for Morwell for failing the students of Traralgon South Primary School by acquiescing to the Government’s imposition of a \$2,900 WorkCover penalty and failing to stand up for the rights of the students and parents of Traralgon South Primary School.
- 42 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Gilmore College for Girls, by capriciously imposing a \$10,000 WorkCover penalty; and (b) notes the comment of the school that ‘one of the teachers fell over a piece of uneven pavement while on a school excursion; what could we have done to prevent this ... we have recently been awarded the National Literacy Award receiving \$10,000 to strengthen our laudable work in this area; perhaps we should simply redirect the cheque’.
- 43 **MR PERTON** — To move, That this House condemns the Member for Footscray for failing the students of Gilmore College for Girls by acquiescing to the Government’s imposition of a \$10,000 WorkCover penalty and failing to stand up for the rights of students and parents of Gilmore College for Girls.

- 44 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Environment for failing to release the Victorian Wind Atlas as promised and for continuing to conceal its contents from stakeholders, particularly local councils and resident groups, when that same Wind Atlas has been made available to the wind industry.
- 45 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for ruling out the requirement for an environment effects statement for the proposed Ballan windfarm against the wishes of local residents and the local council.
- 46 **MR BAILLIEU** — To move, That this House condemns the Premier for riding roughshod over local communities and for mistreating correspondence strongly critical of the Government’s decision on the Burnley Gardens development and, indeed, writing back thanking just such a correspondent for his ‘support for the proposed development’.
- 47 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Greenvale Primary School by capriciously imposing a WorkCover penalty which will cause great financial hardship to this school whose annual income through fundraising, along with all of its direct educational benefits to the students, will be absorbed by this impost; and (b) expresses its support for the School Council President of Greenvale Primary School, Mr Glen Moore, who has said ‘... this will just put more pressure on the school’s ability to deliver its programs which basically means the kids will miss out for what I believe to be a penny pinching exercise by the State Government ... the Government seems to have little idea of the nature of the work teachers, principals, assistant principals etcetera have in today’s environment ...’.
- 48 **MR PERTON** — To move, That this House condemns the Member for Yuroke, the Member for Melbourne North Province; the Minister for Local Government, and Housing, and the Minister for Small Business, and Information and Communication Technology, for failing the students of Greenvale Primary School by acquiescing to the Government’s imposition of a WorkCover penalty and failing to stand up for the rights of the students and parents of Greenvale Primary School.
- 49 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Drysdale Primary School by capriciously imposing a system of WorkCover penalties which will cause anxiety for the school and its management who will have to work hard to preserve the slender \$9 margin keeping them in credit and not deficit this year; and (b) agrees with the School Council President Jim Day, and Principal Claire Wilson, who say ‘it is the Department’s ultimate responsibility to ensure a safe workplace for their employees ... parents should not have to see their fundraising monies spent on WorkCover premium liabilities’.
- 50 **MR PERTON** — To move, That this House condemns the Member for Bellarine and the Members for Geelong Province for failing the students of Drysdale Primary School by acquiescing to the Government’s imposition of an unfair system of WorkCover penalties and failing to stand up for the rights of the students and parents of Drysdale Primary School.
- 51 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Cobden Technical School by capriciously imposing a \$10,000 WorkCover penalty, causing the school to review and likely reduce its commitments to school sporting competitions; and (b) expresses its support for the school view that ‘Cobden Technical School faces a charge against our school global budget for a WorkCover premium of \$10,000; this is in spite of the fact that one “injury” that has caused an

increase in our premium was not one we could have planned for nor guarded against ... Council has concluded that we might well be advised to reduce the level of sporting competition in the school for it was at a school athletics event that the injury referred to above occurred ... was it intended when this policy was drafted to have this impact on schools’.

- 52 **MR PERTON** — To move, That this House — (a) condemns the Minister for Education Services and the Bracks Government for failing the students of Langwarrin Primary School by capriciously imposing an \$8,000 WorkCover penalty which will cause a deficit at the school, an amount equal to the school’s annual fundraising budget, that will directly impact on the school’s educational priorities and result in the slashing of school programs, severely disadvantaging students at the school; and (b) agrees with the School Council President Phil Cavill, and Vice President Lindsey Harris, who say ‘that schools are now made to pay a portion of WorkCover claims is an insinuation that school principals are not properly managing the making of such claims by staff ... WorkCover is a systemic problem and not the responsibility of individual schools’.
- 53 **MR PERTON** — To move, That this House condemns the Member for Hastings and the Member for Western Port Province for failing the students of Langwarrin Primary School by acquiescing to the Government’s imposition of an \$8,000 WorkCover penalty and failing to stand up for the rights of the students and parents of Langwarrin Primary School.

- 227 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to require appropriate monitoring of the performance of the Better Decisions Faster program prompting the Planning Institute of Australia to conclude in a September 2004 report that ‘it is not clear from this report however either the extent of the problem being addressed (volume, spread, frequency) and therefore it is very difficult to establish the likely impact — beneficial or otherwise of the proposals’ and ‘this itself is part of the problem with the Planning System — ad hoc and partially informed adjustments’.

- 234 **MR COOPER** — To move, That this House — (a) notes the insistence of the Premier on the morning of 8 February 2005 on the Neil Mitchell program on 3AW, that his government had not cut disability and impairment funding to special schools, and his further insistence to the three callers who questioned him about this issue, that the government had actually increased funding to special schools; (b) notes that a few hours later on the afternoon of the same day, the Premier instructed the Minister for Education Services to make an additional \$14 million available to special schools to reverse some of the funding cuts, which the Premier had earlier that same day insisted had not occurred; and (c) calls on the Premier to admit that he misled those callers to 3AW, acknowledge that it only took three angry phone calls for him to do a back flip on some of the funding cuts his government imposed on children with a disability, and demands that the Premier now reverse the remainder of those funding cuts which still apply to children with language disorders.
- 235 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to respond to the City of Boroondara in regard to the City's request to establish an advisory committee for local variations to ResCode prompting the Council at its meeting on 15 November 2004 to resolve to write to the Minister to express the following — (a) Council's extreme disappointment that the then Minister for Planning's undertaking to 'fast track' Council's applications have not been honoured in any tangible way, almost three years after the submission; (b) Council's extreme disappointment with the lack of responsiveness or concern from the Department of Sustainability and Environment, in not providing Council with timely feedback on the status of the Minister for Planning's decision to appoint an Advisory Committee, particularly as Council's request was made on 22 January 2002; (c) Council's extreme frustration at the lack of responsiveness from the Department of Sustainability and Environment in not providing feedback on the terms of reference formulated by Council for the Advisory Committee, the final draft of which were sent to the Department on 23 March 2004; and (d) Council's concern that a ministerial commitment and a planning issue of such significance is being ignored or disregarded by the Minister for Planning.

- 236 **MR COOPER** — To move, That this House condemns the Bracks Government for continuously attempting to rewrite history by stating that electricity gaming machines were introduced into Victoria by the Kennett Government, and the House notes that — (a) electronic gaming machines were introduced into Victoria by the Kirner Labor Government in 1991; (b) on 28 May 1991 the then Minister for Gaming, the Hon David White, announced in Parliament that the Government intended to permit between 30,000 and 40,000 electronic gaming machines to operate in Victoria; (c) that Mr White repeated that statement in Parliament on 4 June 1991; and (d) that the Member for Thomastown, the present Minister for Transport, on 4 August 1991 in Parliament fully endorsed and supported the proposition of his party to have up to 40,000 gaming machines; the House therefore calls on the Government to admit that any pain and social damage that has been caused by electronic gaming machines is due to the decision of the Labor Party to introduce them into Victoria, and to further acknowledge that it was the Kennett Government that put a cap of 27,500 on the number of machines permitted to operate in Victorian hotels and clubs.

- 255 **DR NAPHTHINE** — To move, That the Bracks Labor Government recognises the dangerous state of the Surry River Bridge on the Princes Highway at Narrawong and in particular notes that the bridge is far too narrow, riddled with concrete cancer and dangerously out of alignment with both approaches and provides funding in the 2005/2006 State Budget to build a new, safer bridge at Narrawong.

NOTICES RENEWED ON 6 JUNE 2006

- 260 **MS CAMPBELL** — To move, That this House extends its sympathy to the Leader of the Opposition for his unfortunate resemblance to the former West Australian Liberal leader, Colin Barnett, in his naivety presuming that the Federal Treasurer will open the purse strings and remove tolls on the Eastlink Project.
- 261 **MS CAMPBELL** — To move, That this House commends the unnamed Liberal member cited in *The Age* on 29 March 2005 who rightly claimed there ‘are a few Liberal MPs’ who ‘deserve a bullet’ and though no Labor member would condone murder, we commend him for his honest, though cowardly anonymous metaphorical appraisal of his party’s current turmoil.
- 262 **MR PERTON** — To move, That this Parliament deplores the Bracks Government’s decision to abolish the Police in Schools Program at a time when school communities want this program to expand rather than disappear.
- 263 **MS CAMPBELL** — To move, That this House condemns the Member for Doncaster in his role as spokesman for Education and Training condemning schools in Coburg and using their hard working students and teachers to make a few grubby comments against the Bracks Government, which cares for the education of our children and puts their needs above politics.
- 264 **MR PERTON** — To move, That this Parliament calls on the Bracks Government to release the investigator’s report on bullying and an attempted suicide at Mornington Park Primary to parents of the young boy and condemns the government for spending tens of thousands of dollars on legal costs fighting release of the documents rather than on eliminating violence and bullying in this school community.

- 272 **MS CAMPBELL** — To move, That this House extends the sympathy to The Nationals' Victorian division in their recent realisation that Mr Doyle holds a desire to run in every seat demonstrating to all that the Liberal Party is only concerned with winning seats, not doing the right thing by people they claim to represent and call political friends.
- 273 **MS CAMPBELL** — To move, That this House extends its congratulations to the three winners of the Premier's VCE Awards from the electorate of Pascoe Vale — Joanne Glue for psychology, Anthony Trigona for accounting and Emma Shortis for history.
- 274 **MS CAMPBELL** — To move, That this House congratulates Moreland City Council for taking the initiative, and ignoring the Howard Government's intransigence to address the vital issue of conducting a public meeting on aged care to examine ways in which local elderly people can be better cared for and maintain their dignity and quality of life.
- 275 **MS CAMPBELL** — To move, That this House sympathises with the Liberal Party for its obtuse and naive policy, if it can be called such, of introducing a Hoon Hotline which will do nothing more than obfuscate the problem, increase delays and give vexatious complaints with an

axe to grind a public forum in which to do so and detract from the appropriate mechanisms, 000 for an emergency and Crime Stoppers.

- 276 **MS CAMPBELL** — To move, That this House laments that the literary community of Victoria will be, to the delight of members on this side of the House, denied the chance to read the latest round of propaganda on former Premier Jeff Kennett, as the Bracks Government rightly refuses to indulge Mr Kennett's ego any further at the expense of Victorian dollars for a work which would be better suited to its subject matter were it to be printed on softer, perforated paper.

NOTICES RENEWED ON 8 JUNE 2006

When we go through the gate we get the answers correct, we get the scoping correct, we get the budgeting correct, we know what all the things are that are in front of us and we will move forward in consultation as quickly and as expediently as we can' and awaits in anticipation the results of this process.
- 278 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Member for Northcote for the Government's call-in and approval of two high-rise towers in Northcote, against the wishes of the local community, prompting a packed public meeting on Wednesday 20 April 2005 to condemn the State Government and further prompting former Federal Labor MP and longstanding ALP member Peter Milton to declare the sad part for Labor people is that in regard to planning 'they (the Government) don't understand what they are doing to Melbourne' and another ALP member to storm out of the meeting declaring he would tear up his Labor Party Membership.
- 279 **MS ASHER** — To move, That this House notes the Government's new policy to try to deliver major projects on time and on budget — the Gateway Review process — described by the Minister as follows 'This government's way of dealing with that is to methodically go through six gates — one, two, three, four, five and six. As we go through those gates we will announce the outcomes. As we go through those gates we will with confidence go to the next step so that we do not have cost overruns and we do have strategic decisions in place' and expresses its curiosity and incredulity as to whether this method can deliver projects on time and on budget — something two previous Ministers for Major Projects could not.
- 280 **MS CAMPBELL** — To move, That this House commends the Minister for Community Services and her department for working to ensure that low income families will get extra help to fund their children through kindergarten and thus give children the best start in life and reduce the risk of them falling behind or getting stuck in a cycle of disadvantage.

- 286 **MR COOPER** — To move, That this House condemns the Member for Pascoe Vale for her insulting and ill-informed attack on the Liberal Party policy to establish a dob-in-a-hoon hotline, which mirrors a highly successful program that was put into operation 18 months ago by the Victorian Police in Mornington; the House calls on the Member for Pascoe Vale to apologise to the Victoria Police for describing their fantastic Mornington initiative as nothing more than an obfuscation that will increase delays and give vexatious complainants a public forum, and the House assures the Victorian community that the Liberal Party has their best interests at heart even if the Member for Pascoe Vale does not share that view.
- 287 **MR BAILLIEU** — To move, That this House calls on the Member for Planning to ensure that Amendment No C14 in the Shire of Murrindindi does not proceed until it is deemed to take into full account the concerns of the residents of Glen Burn.

- 291 **MR COOPER** — To move, That this House condemns the Minister for the Arts when, during her inglorious time as Minister for Planning, she was so unconcerned about the loss of 328 employees' jobs at the Hilton on the Park Hotel at East Melbourne, that she could not be bothered advising the Premier of the possible closure of the hotel, thus confirming to all and sundry her position as the worst Minister for Planning of all time.
- 292 **MS CAMPBELL** — To move, That this House condemns the Howard Government for its blinkered stance on Voluntary Student Unionism and their pathological fear of the 'U' word especially in the cases of Student Unions where the fees are more like taxes levied to provide essential services to students, therefore to introduce VSU would be to introduce something akin to an only-if-you-fee-like-it tax system.

NOTICES RENEWED ON 26 OCTOBER 2005

- 293 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to even adequately acknowledge, let alone respond to, correspondence from Helen Whiteside of Fitzgibbon Crescent Caulfield North in regard to inappropriate development which has been approved by VCAT in her street, prompting her to write in a letter to the Minister, dated 13 May 2005 — 'You Mr Hulls will be held accountable by future generations, for irreparable damage to our established suburbs in years to come,' and urges the Minister to accept her invitation to join her in touring the street and seeing first hand the evidence of neighbourhood character which the approval ignores.

- 558 **MS BEATTIE** — To move, That this House condemns the Leader of the Opposition for his blatant disregard for the talent of women, which is evidenced by the Liberal Party preselections that have seen a mere 10 women out of 72 preselections completed so far for the Legislative Assembly and eight women and 27 men preselected for the Legislative Council.
- 559 **MS BUCHANAN** — To move, That this House calls on the Leader of the Opposition to publicly condemn the Opposition police spokesman for the disgraceful comments made about police time being wasted on family violence cases, and to publicly acknowledge that family violence is a criminal offence and, as such, is exactly what Victorian communities expect our police force to act on as a vital part of frontline policing to forge safer communities for all Victorian families.

- 563 **MR MULDER** — To move, That this House condemns the Minister for Transport for failing to upgrade the level crossing on the Lismore-Skipton Road, and the Minister’s bungling and delays featured in the preliminary report by the Australian Transport Safety Bureau whereby they noted the Minister let a tender for the work in September 2005 and the works are not to be completed until March 2007 at the earliest.

NOTICES OF MOTION

Earlier notices appear in the consolidated version of this notice paper, available online at www.parliament.vic.gov.au [Legislative Assembly — Documents — Chamber Documents — Notice Papers].

NOTICES GIVEN ON 23 AUGUST 2006

- 555 **MR INGRAM** — To move, That this House acknowledges the wisdom in the comments of the Member for South West-Coast in the *Sunday Age* on 20 August 2006 when he confirmed what country people have known for a long time that if the Liberal Party requires the votes of The Nationals for form government that like previous coalition governments it will be the Liberal Party policies that will again prevail.
- 556 **MR ROBINSON** — To move, That this House notes with concern the recent advice of the Federal Minister for Environment, Senator Ian Campbell, acting on behalf of the Prime Minister, in rejecting requests for a Federal Government contribution to secure land adjacent to Blackburn Lake, noting that it contradicts earlier assurances from the Federal Liberal Member for Deakin who assured Blackburn residents in early June that he had taken the matter up with the Prime Minister and anticipated a definitive statement soon on Federal Government assistance, and further noting that the Federal Government on two previous occasions has cooperated with the

Victorian Government and local council to assist in land acquisitions around the iconic lake reserve.

- 557 **MR DELAHUNTY** (*Lowan*) — To move, That this House notes that western Victoria is in the grips of a drought which is impacting negatively on the economic and employment activities of the region and calls on Government ministers to visit the area and hold discussions with industry groups such as the Victorian Farmers Federation, manufacturers, retailers and local government, and develop support programs that will assist farmers and small businesses to keep their very valuable skilled staff.
- 558 **MS CAMPBELL** — To move, That this House congratulates scientists and the Royal Melbourne Hospital medical team who have used adult stem cells, from a patient's own bone marrow, to successfully regenerate new bone for a severe (5 cm x 3 cm) femur bone break by implanting the adult stem cells in the patient's leg and thus giving this patient functional use of his leg and giving the ethical edge in this internationally groundbreaking discovery, again reinforcing Victoria's pre-eminent standing in biotechnology.
- 559 **DR SYKES** — To move, That, in light of the most recent Goulburn-Murray Water projections that Broken River irrigators have eight chances in 10 of 100 per cent water rights whereas Goulburn System irrigators have only four chances in 10 of 100 per cent water rights, this House calls on the Minister for Water to explain how the Government is going to honour the commitment to maintain current security of water supply to irrigators on the Broken System who are going to transfer to the Goulburn System in the event of Lake Mokoan being decommissioned.
- 560 **MR ROBINSON** — To move, That this House notes with concern the move earlier this year by the Federal Government to construct a \$336 million detention centre on Christmas Island adjacent to the habitat of the endangered Abbott's booby, noting the same Government's decision to block the establishment of a major Victorian windfarm on the basis of potential harm to the similarly endangered orange-bellied parrot, and calls on the Federal Government to fully explain to all Victorians the relative survival prospects of these two rare Australian birds.
- 561 **MR DELAHUNTY** (*Lowan*) — To move, That this House notes that Grampians Wimmera Mallee Water (GWM Water) storages are at a record low level of seven per cent and GWM Water will only run water to town storages and those not on town systems will receive by truck 28,000 litres every second month and calls on the Government to rebate 50 per cent of the purchase of tanks to store this carted water or for the storage of rain water.

NOTICES GIVEN ON 12 SEPTEMBER 2006

- 560 **MS ASHER** — To move, That this House expresses its disappointment and regret that a four-storey development in Warleigh Grove, Brighton has now been foisted on the Brighton community by the Victorian Civil and Administrative Tribunal in opposition to community sentiment and out of character with residential amenity in Brighton.

- 561 **MRS SHARDEY** — To move, That this House remembers with great sorrow the events of 11 September 2001 when terrorists struck the World Trade Centre towers in New York, killing thousands of innocent people and bringing to a focus the shocking acts of extremists and fanatics, who seek to destroy and harm the democratic way of life and institutions we all regard as central to our way of life, which values harmony and respect for others, their race and their beliefs.
- 562 **MS CAMPBELL** — To move, That this House applauds the hard work of the current and past principals and school council members of Pascoe Vale North Primary School and commends the Minister for Education and Training for giving planning approval to Stage Two of the school's master plan which includes a library, an art room, an administration area, general purpose classrooms and staff and student toilets; all of which is part of an additional \$6.3 billion committed by the Bracks Government to education and training.
- 563 **MS ASHER** — To move, That this House expresses its support for the abolition of Labor's failed 2030 policy which is currently destroying residential amenity in Brighton and Hampton.
- 564 **MS BEARD** — To move, That this House places on record its condolences to the family of the late John Cummins and extends its sympathy to his friends and to all members of the Construction, Forestry, Mining and Energy Union.
- 565 **MS ASHER** — To move, That this House condemns the Minister for Planning for recklessly and wilfully embarking on Labor's 2030 planning policy knowing that it would destroy community and residential amenity in Brighton and Hampton.
- 566 **MS CAMPBELL** — To move, That this House congratulates the Minister for Education and Training for granting planning approval for Pascoe Vale Girls College to develop a science block including general purpose classrooms, science rooms and an environment centre which will improve student engagement in years seven to 10 science, and thus incorporate the integration of environmental education in a relevant, up-to-date, technology-rich environment that will lead to an expansion of students' post compulsory pathways.
- 567 **MS ASHER** — To move, That this House calls for the Labor Government and the Minister for Planning to withdraw Labor's failed 2030 policy, to wind back the powers of the Victorian Civil and Administrative Tribunal to override community sentiment, and to listen to the residents of Brighton and Hampton in their vehement opposition to Labor's policies.
- 568 **MR THOMPSON** — To move, That this House condemns the Bracks Government for the removal of crime statistics for Victoria by local government area for 2005–06 from the Victoria Police website which saw crime increase in the City of Bayside by 50 per cent for robberies, 55 per cent for burglaries (other), 26 per cent for property damage, 24 per cent in thefts from motor vehicles, 18 per cent in shop theft and 14 per cent in assault.
- 569 **DR NAPHTHINE** — To move, That this house condemns the Minister for Water for displaying his ignorance of water issues in Ballarat and misleading the House when he said on 24 August 2006 that Geelong has half share of the water in Lal Lal reservoir and that there was no water in Lal Lal when the Minister should have known that Geelong has a one-third share of Lal Lal and that on 16 August 2006 Lal Lal was holding over 9,900 megalitres of water, not zero.
- 570 **MR THOMPSON** — To move, That this House condemns the Bracks government for abandoning former public housing tenant Harriet Hunter and her special needs son Erik and leaving them on the bottom of a public housing waiting list after they were forced to flee their

Ministry of Housing rental property, noting that following assurances to the press that the Department would be instructed to take urgent action, no support has yet been provided.

- 571 **DR NAPTHINE** — To move, that this House notes with real concern the fact that another doctor has recently left Portland which increases the crisis at the Portland Hospital's accident and emergency department.
- 572 **DR NAPTHINE** — To move, that this House notes with alarm that since 18 May 2006 there have been 28 days when no doctor was available at the Portland Hospital accident and emergency department and that the hospital has already announced that there will be at least five days in the month of September 2006 when there will be no doctor available or on call.
- 573 **DR NAPTHINE** — To move, that this House condemns the Bracks Labor Government for failing to respond adequately to the Portland Hospital accident and emergency crisis and notes that the situation is getting much worse, not better.
- 574 **DR NAPTHINE** — To move, that this House condemns the Minister for Health for failing to take responsibility for the accident and emergency crisis at the Portland Hospital and for refusing to even visit Portland to meet concerned community members or attend a summit being called to address this life-threatening health crisis.
- 575 **DR NAPTHINE** — To move, that this House condemns the city-centric Bracks Labor Government for ignoring the health needs of the Portland and district community despite this community being a major contributor to the economic health of the State.
- 576 **DR NAPTHINE** — To move, that this House congratulates the State Liberal Party for its commitment to fully fund the redevelopment of the Warrnambool Hospital including a helipad and radiotherapy facilities and urges the Labor Party, which let down the Warrnambool community by failing to fund this much-needed redevelopment in the May 2006 State Budget, to follow the Liberal lead on this important issue.
- 577 **DR NAPTHINE** — To move, that this House strongly supports the decision by the State Liberal Party to replace the out-of-date Warrnambool ambulance station with a new, state-of-the-art facility on the site of the proposed Warrnambool Hospital redevelopment.
- 578 **DR NAPTHINE** — To move, that this House congratulates the Tyrendarra Football Netball Club for winning premierships in the Under 17 and C Grade netball as well as in both the Reserves and Seniors football, particularly noting that the Senior football team has played in six consecutive grand finals for four premiership victories and that the Tyrendarra Reserves has now won 111 consecutive matches and seven premierships in a row.

NOTICES OF MOTION

Earlier notices appear in the consolidated version of this notice paper, available online at www.parliament.vic.gov.au [Legislative Assembly — Documents — Chamber Documents — Notice Papers].

NOTICES GIVEN ON 14 SEPTEMBER 2006

- 586 **MR RYAN** — To move, That this House condemns the Labor Members for Morwell and Narracan for their failure to stand up on behalf of Gippslanders in the face of the proposal of the Bracks Government to develop the Eastern Treatment Plant which will inevitably mean even more Gippsland water being piped to Melbourne and calls upon the Members for Morwell and Narracan to protect their respective constituencies rather than succumbing to the directions of Melbourne Labor.
- 587 **MS LOBATO** — To move, That this House notes that when the Bracks Government came to office the unemployment rate was 6.6 per cent and applauds the Bracks Government for putting in place the policies and programs that have delivered Victoria's lowest unemployment rate for more than 15 years — since April 1990 — at just 4.6 per cent, compared to the national rate of 4.9 per cent, a massive two percentage point drop since 1999.
- 588 **MR RYAN** — To move, That this House notes that Gippsland presently contributes to this state 90 per cent of Victoria's electricity, 97 per cent of Victoria's natural gas, 25 per cent of Australia's crude oil, 60 per cent of Melbourne's water and 19 per cent of Australia's dairy, as well as being one of Victoria's leading tourist destinations and calls upon the Bracks Labor Government to guarantee to Gippslanders that no more of their water will be taken for the purpose of watering the lawns and the gardens of Melburnians who must simply learn to live within their water means.
- 589 **MS CAMPBELL** — To move, That this House acknowledges Coburg Senior High School as one of 687 schools to undergo major capital works valued at more than \$100,000 and recognises the principal, planning committee and working party members whose work has enabled the Minister for Education and Training to support planning approval for the development of visual and performing arts facilities, food technology, general purpose classrooms and staffrooms and the incorporation of their information and communications technology strategy.
- 590 **MR MAUGHAN** — To move, That this House calls on the next State Government to commit to strategic action on dementia for Victorian families and to provide \$30 million over the next four years to improve awareness, assessment, assistance and access to dementia services in the Victorian community.
- 591 **MR RYAN** — To move, That this House condemns the Bracks Labor Government for its plans to take even more water resources from Gippsland and calls upon Melbourne Labor to amend its proposals for the development of the Eastern Treatment Plant so that recycled water from that facility is piped back to Melbourne from where it originated and used by metropolitan based

businesses and/or on suburban lawns and gardens thereby allowing Gippslanders to retain their water for their future prosperity.

- 592 **MR MERLINO** — To move, That this House acknowledges that Victoria is the only state in Australia that has experienced an increase in jobs every single month in 2006 and that, for the month of August 2006, 11,500 new jobs were created in Victoria, which makes up almost half of the 23,400 jobs created nation-wide, even though Victoria only has a quarter of the national population, and that since the Bracks Government came to office there have been 362,400 jobs created.
- 593 **MR RYAN** — To move, That this House condemns the Bracks Labor Government for its failure to address the appalling state of builders warranty insurance which presently sees industry and consumers alike suffering under a system which fails utterly to protect any of the stakeholders, albeit costing a fortune in insurance premiums, a cost which in turn is reflected in the price of housing to consumers, and calls upon the Government to adopt the highly successful Queensland system of builders warranty insurance as being appropriate for application in Victoria.
- 594 **MR MAUGHAN** — To move, That the Minister for Community Services be condemned for failing to provide a funding increase of more than 2.6 per cent for non-government community service providers, when the figures clearly show that costs have increased much more than that, and that an increase of at least 4.5 per cent is required simply to maintain services at the present level.
- 595 **MR MAUGHAN** — To move, That the Bracks Government be condemned for continuing to reduce the level of service provided by the Government for natural resource management and in particular its dereliction of its duty to control pest plants and animals.

NOTICES GIVEN ON 3 OCTOBER 2006

- 595 **MR THOMPSON** — To move, that this House condemns the Bracks Government for failing to fulfil its commitment to repeal over 200 Acts of Parliament which varied the jurisdiction of the Supreme Court, described by a current minister as action unprecedented in the western world, and, in addition, for introducing approaching 100 section 85 clauses of its own which vary or alter the jurisdiction of the Supreme Court.
- 596 **MS GREEN** — To move, that this House congratulates the Greensborough Hockey Club following its spectacular sweep of the State league double on 24 September 2006.
- 597 **MRS POWELL** — To move, that this House calls on the Government to ensure there is immediate support for those affected by the recent frost devastation in the Goulburn Valley by urgently forwarding the exceptional circumstances application to the Federal Minister for Agriculture to allow for a speedy decision and allocation of funds for farmers in the Shepparton district and further that due consideration is given to the many businesses who have also been affected by the long term climatic conditions such as drought, hail and now frost and includes those businesses in the data collection for exceptional circumstances to enable business to also receive support.
- 598 **MR ROBINSON** — To move, that this House rejects the Liberal Party's policies on the Bracks Government's \$54 million Middleborough Road grade separation project, noting the earlier statement by the Liberal Member for Koonung Province that the project should be scrapped, and the recent insistence by the Liberal candidate for Mitcham that an island platform must be included, notwithstanding that this would require the compulsory acquisition of adjoining residential property, and his further insistence that a bus interchange be constructed notwithstanding that no buses actually run past the station.
- 599 **DR SYKES** — To move, that this House condemns the Minister for Water for failing to honour his commitment to retain current security of supply of water to irrigators dependant on Lake Mokoan in the event that Lake Mokoan is decommissioned and that this House calls upon the Minister to have an independent assessment of the level of security on supply of water undertaken as a matter of urgency.
- 600 **MR MILDENHALL** — To move, that this House congratulates the Minister for the Arts for her outstanding leadership as the longest serving minister on the national Cultural Ministers Council, which has recently adopted the Victorian proposed model for national leadership in policy framework, thus enhancing Victoria's leading role in national policy as well as having Australia's pre-eminent city for cultural venues, innovative companies and events, and the highest level of participation in the arts.

- 601 **MR THOMPSON** — To move, that this House calls for the Labor Government and the Minister for Housing to detail the distribution of the money in relation to the Victorian Government Loan Scheme from its \$80 million rescue package of 2002.
- 602 **MR LEIGHTON** — To move, that this House notes that the Leader of the Opposition told the House that his observation was Summerhill Residential Park residents are offered good value, and that the Victoria Civil and Administrative Tribunal subsequently found that the rents paid by Summerhill residents are excessive and ordered that they be lowered; and the House now calls on the Leader of the Opposition to apologise to the residents of Summerhill Residential Park for his insensitive, uncaring and out of touch comments.
- 603 **MRS POWELL** — To move, that this House calls on the Minister for State and Regional Development to make an assurance that the \$2 million allocated by the State Government to assist in building a new La Trobe University in Shepparton will not be lost to the Shepparton community if La Trobe decides to downsize its University to a ‘Super Resource Centre’ and instead makes the funding available to the Shepparton community to allow other opportunities for a stand alone tertiary facility which is vitally needed to provide tertiary education in Shepparton to cope with the tertiary education demands of an increasing population, a large catchment area, and many businesses needing access to locally trained and tertiary qualified people.
- 604 **MS GREEN** — To move, that this House congratulates the Diamond Creek Women’s Football Club who defeated Hadfield to take out the North West Division Grand Final of the Victorian Women’s Football League, making themselves back to back winners after taking out the Division 3 Premiership in 2005.
- 605 **MR THOMPSON** — To move, that this House condemns the Bracks Government for its failure to improve indigenous literacy and numeracy rates in Victoria noting that the benchmark grades three and five level rates are 15 per cent lower than those for non-indigenous students.
- 606 **MR THOMPSON** — To move, that this House condemns the Bracks Government for its failure to address health outcomes in the indigenous population where indigenous mothers were approximately twice as likely to be of low birth weight and indigenous life expectancy is approximately 18 years less than the Victorian average.
- 607 **MR THOMPSON** — To move, that this House condemns the Bracks Government for its failure to decrease indigenous over-representation in the criminal justice system with indigenous persons being 14 times more likely to be imprisoned than non-indigenous persons.
- 608 **MR THOMPSON** — To move, that this House condemns the Bracks Government for its failure to respond to community concerns in relation to the impact of Melbourne 2030 across Melbourne and in particular in the City of Bayside where a large number of Council rulings have been overturned by the Victorian Civil and Administrative Tribunal based on the implementation of 2030 guidelines.
- 609 **MR THOMPSON** — To move, that this House congratulates the Leader of the Opposition on setting the pace for public transport reform and innovation at the Mentone Railway Station which in turn led the Minister for Transport to make his own visit to Mentone, a site at which only a few years earlier he had supported, in writing, the concreting of part of the gardens for a bus interchange.

-
- 610 **MR THOMPSON** — To move, that this House condemns the Bracks Government for selective notification of crime statistics.
- 611 **MR THOMPSON** — To move, that this House condemns the Bracks Government for failing to properly manage public transport needs on the Sandringham and Frankston lines leading to commuters being unable to board over-crowded trains at minor stations or having to squeeze into trains that are already over-crowded to avoid being late for appointments.
- 612 **MR THOMPSON** — To move, that this House condemns the Bracks Government for its failure to efficiently manage the continuing cancellations and delays on the Sandringham and Frankston train lines leading to massive over-crowding, and its failure to plan for increased patronage during peak hours while spending over \$80 million on advertising, creating public safety risks and creating panic and concerns on the part of passengers unable to alight.
- 613 **MR THOMPSON** — To move, that this House condemns the Bracks Government for failing to properly manage public transport needs leading to the massive over-crowding of trains on the Sandringham and Frankston lines giving rise to physical distress on the part of passengers.
- 614 **MR THOMPSON** — To move, that this House condemns the Bracks Government for the distress caused to commuters who, as a consequence of cancelled and over-crowded trains on the Sandringham and Frankston lines have been unable to meet appointment commitments.

- 616 **MR THOMPSON** — To move, that this House condemns the Bracks Government for its oppressive land tax regime which has forced a landmark business in Sandringham along with many other Victorian businesses to close.
- 617 **MR THOMPSON** — To move, that this House condemns the Bracks Government for the reduction in the multi-purpose taxi concessions to eligible pension recipients.
- 618 **MR THOMPSON** — To move, that this House condemns the Bracks Government for the dismantling of the police in schools program which has had a profound effect on the relationships between young people and the police force over a considerable period of time.
- 619 **MR THOMPSON** — To move, that this House condemns the Bracks Government for the removal of the 100 per cent concession on car registration for eligible pensioners.
- 620 **MR THOMPSON** — To move, that this House condemns the Bracks Government for the wastage of taxpayer money on Government promotions instead of targeting these funds to health, education and public transport both in the Sandringham electorate and across Victoria.
- 621 **MR THOMPSON** — To move, that this House condemns the Bracks Government for its reliance on increasing taxes and charges and the impact of Bayside Health imposing car parking charges at the Sandringham Hospital car park which has severely impacted on neighbourhood amenity and surrounding businesses.
- 622 **MR THOMPSON** — To move, that this House condemns the Bracks Government for its withdrawal of funding for youth counselling provided by Family Life in the Bayside Community.

-
- 623 **MR THOMPSON** — To move, That this House condemns the Bracks Government for its failure to efficiently manage Victoria's rail network.

- 625 **MR THOMPSON** — To move, That this House condemns the Bracks Government for its failure to include water collection and recycling measures in the design and construction of the Southern Cross Railway Station where it is estimated that 18 million litres of rainwater will flow off the roof each year into drains.
- 626 **MR THOMPSON** — To move, That this House condemns the Bracks Government for its failure to manage the implementation of the computerised public housing maintenance system which has resulted in the loss of millions of dollars to Victorian taxpayers and has caused significant delays in maintenance responses due to loss of orders for work to be performed.
- 627 **MR THOMPSON** — To move, That this House condemns the Bracks Government for its failure to provide adequate housing for indigenous people living in old cars and caravans on the Framlingham Reserve.
- 628 **MR THOMPSON** — To move, That this House condemns the Bracks Government for its failure to address unemployment rates for the indigenous population noting that, according to Australian Bureau of Statistics data, unemployment rates for the indigenous population have fallen in every state between 2002 and 2005 except Victoria and the Northern Territory where it has risen in both cases, with the Victorian rate standing at 19.4 per cent.
- 629 **MR THOMPSON** — To move, That this House condemns the Bracks Government for its failure to establish a parliamentary sitting program providing for open and accountable government noting the paucity of sitting days in an election year.
- 630 **DR NAPTHINE** — To move, That this House recognises the significant effect of Parkinson's on the 20,000 Victorians with Parkinson's and their families and expresses its disappointment that the Bracks Labor Government has refused to provide regional support workers to help people with Parkinson's and their carers.
- 631 **DR NAPTHINE** — To move, That this House notes that Parkinson's costs Victoria \$1 billion each year in both direct and indirect health costs and urges the incoming State Government to better understand that the provision of local support workers to help people with Parkinson's and their families will help improve their quality of life and also save significant money in both acute health and aged care services.
- 632 **DR NAPTHINE** — To move, That this House notes that over 1,000 Victorians are diagnosed with Parkinson's each year and 20 per cent of those are under 50 years old and urges the incoming State Government to respond in a more compassionate, caring and understanding way to the request from Parkinson's Victoria for specialist services, especially in rural areas than the complete refusal of the Bracks Labor Government to provide any regional support services.
- 633 **DR NAPTHINE** — To move, That this House condemns that city-centric Bracks Labor Government for its uncaring neglect and mismanagement of public dental services in south west Victoria where people are forced to wait 66 months in Portland, 55 months in Warrnambool and over three years in Hamilton for dental care.

GENERAL BUSINESS

NOTICES OF MOTION

NOTICES RENEWED ON 20 JULY 2006

- 1 **MR BAILLIEU** — To move, That this house condemns the Minister for Planning for — (a) failing to consult Victorian communities, in particular Victorian coastal communities, in

regard to the establishment of guidelines for the development of wind energy facilities; and (b) failing to adequately protect sensitive areas of Victoria's precious coastline from the adverse impact of wind energy facilities.

- 2 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Education and Training for alienating and then allowing the complete development and destruction of community parkland in Malleehen Street, Werribee when this park has for more than 20 years been maintained as parkland including a playground and has provided the only safe and easily accessible public open space for neighbourhood children.
- 3 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for authorising the complete destruction and re-development of community parkland at the site of the former Karingal Park Secondary College in Frankston.
- 4 **MR BAILLIEU** — To move, That this House condemns the Minister for Education and Services and the Minister for Planning for failing to ensure the retention of public open space adjacent to the Irabina Special School in Kingloch Parade in Wantirna.
- 5 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Environment for failing to prevent the unilateral destruction by Melbourne Water of some 200 mature trees at Pridmore Park in Hawthorn.
- 6 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Environment for failing to prevent the unilateral closure of a Yarra River walking track in Hawthorn and for failing to assist the City of Boroondara and local residents in working to have the walking track reopened.
- 7 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning and the Minister for Education and Training for secretly initiating a proposed sale of land from Ashwood College in Burwood including a significant wetlands area, for the purpose of a housing development.
- 8 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for issuing, on 23 May 2003, without notice, consultation or explanation, a new ministerial order regarding home builders warranty insurance to exempt Government agencies through the Director of Housing from the Government's own home builders warranty insurance requirements, but leaving private builders to suffer the burden of this rapidly failing and manifestly inadequate and inequitable system.
- 9 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to adequately monitor the impact and consequences of the Government's home builders warranty insurance system on consumers and builders, in particular inadequate cover, inconsistent eligibility criteria, inequitable demands on builders, high premiums, non-recognition of previous performance, incapacity to tender, enormous time loss and administrative burden and aggregate work limits.
- 10 **MR PERTON** — To move, That this House condemns the Bracks Government for withholding vital maintenance funding from schools again this year, for cutting corners and for politicising the upkeep of school grounds and buildings in Victoria at the cost of certainty, community safety and the proper, efficient forward planning of the educational system, and for presiding over the destruction of a skills and competencies base surrounding the development of the Physical Resource Maintenance System in education, which must be restored.

-
- 11 **MR PERTON** — To move, That this House condemns the Bracks Government for its broken promise to spend \$50 million to fund the purchase of what were in its own words ‘urgently needed’ new relocatable classrooms for Victoria’s schools and for instead paying for expensive maintenance of seriously outdated portable classrooms which are constructed from asbestos and should be retired.
- 12 **MR BAILLIEU** — To move, That this House urges the Victorian Government to immediately alter its windfarm guidelines to ban windfarms from sensitive environmental and coastal locations.
- 13 **MR BAILLIEU** — To move, That this House warmly congratulates all those associated with the concept and production of the book *You Are Not Alone* by Sane Australia and, in particular, congratulates Dan Halloran, an extraordinary 15-year-old Victorian whose personal experience dealing with the mental illness of his mother Virginia, and the dedication of his father John, inspired the book — a book which provides the chance for children with a parent or family member with a mental illness to understand and cope just as Dan and his father coped with not only Virginia’s mental illness but also her tragic death from cancer last year, following a long problematic diagnosis and treatment regime, the truth of which still awaits resolution by the Minister for Health.
- 14 **MR PERTON** — To move, That this House condemns the Bracks Government for its continued failure to respond to Questions on Notice and be open and accountable for its acts.
- 15 **MR BAILLIEU** — To move, That this House gives its unequivocal support to the Australian Rugby Union in its campaign to overturn the proposed ban on the singing of *Waltzing Matilda* at the forthcoming World Cup and urges fans, in the great traditions of the song itself, to sing it anyway.
- 16 **MR BAILLIEU** — To move, That this House calls on the State Government to guarantee that the proposed development at Burnley Gardens not be called in.
- 17 **MR PERTON** — To move, That this House calls on the Chair and other Government members of the all-party Public Accounts and Estimates Committee to stand up to the Premier’s outrageous ‘Guidelines for Submissions and Responses to Inquiries’ that they are now required by the politburo Department of Premier and Cabinet to implement, and that these Government members come forward and detail to the House each occasion when independent departmental and statutory authority submissions and advice have been censored, edited or vetoed so as to compromise Government members’ responsibilities to this Parliament’s independent committee work.
- 18 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to protect Melbourne’s open space resources and undermining the amenity of that open space including at Royal Park, Jolimont, Kew Cottages, Burnley Gardens, Werribee, Frankston, Bayswater and the Yarra.
- 19 **MR BAILLIEU** — To move, That this House condemns the Minister for Transport and the Minister for Planning for their silence on the proposed closure of the Swanston Street entrance to Melbourne Central Train Station on the corner of La Trobe Street which will inconvenience thousands of public transport users, disrupt the popular train/tram interchange and force commuters to undertake a circuitous route through the Melbourne Central Shopping centre to access the station.

- 20 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for doing nothing to prevent the practice of Councils rejecting applications for in-ground swimming pools because of their clearly ludicrous and arbitrary contention that the excavation involved would contravene local covenants preventing quarry or mining in metropolitan Melbourne.
- 21 **MR PERTON** — To move, That this House condemns the Bracks Government for failing the students of Daylesford Primary School by deliberately setting a staffing budget for the school which will force the school to shed experienced staff and cut support programs for students and, further, that this House agrees with the School Council President, Colin Priest, that this is ‘deplorable for a Government that had education as a key election promise’ and ‘this funding crisis is having a negative effect on teacher and student morale’.
- 22 **MR PERTON** — To move, That this House condemns the Member for Ballarat East for failing the students of Daylesford Primary School by acquiescing to the Bracks Government staffing budget for the school which will force it to shed experienced staff and cut support programs for students and further condemns him for failing to defend the right to a good education in the state schools of Daylesford.
- 23 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Thomastown West Primary School by capriciously imposing a \$10,000 WorkCover penalty which will cause a reduction in the size of the teaching staff at the school and, further, that this House agrees with the School Council President, Lisa Courescas, that this Government should ‘rescind this unjust financial imposition on schools’.
- 24 **MR PERTON** — To move, That this House condemns the Member for Thomastown for failing the students of Thomastown West Primary School by acquiescing to the Government’s imposition of a \$10,000 WorkCover penalty and failing to stand up for the rights of the students and parents of Thomastown West Primary School.
- 25 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Lorne-Airey’s Inlet P-12 College by capriciously imposing a \$10,000 WorkCover penalty which will cause a reduction in the size of the teaching staff at the school and further, that this House expresses its support for the School Council President, Angus McKenzie, who has said, ‘this school council is disappointed and angry at the Government’s policy of devolving WorkCover premium to schools; we have already endured one bitter disappointment this year when the long awaited building project was not listed for master planning’.
- 26 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Daylesford Secondary College by capriciously imposing a WorkCover penalty which will cause a reduction in the size of the VCE teaching staff at the school and, further, that this House agrees with the Daylesford Secondary College School Council President, Barry Golding, and the Principal, Heather McIntyre, that ‘this policy is an indictment on those who wrote it and those who support it; in the end the losers are our students’.
- 27 **MR PERTON** — To move, That this House condemns the Member for Ballarat East for failing the students of Daylesford Secondary College by acquiescing to the Bracks Government staffing budget for the school which will force it to shed staff because of a WorkCover penalty imposed by the Minister for Education Services and further condemns him for failing to defend the right of children to a good education in the state school of Daylesford.

-
- 28 **MR PERTON** — To move, That this House dissents from the ruling of the Speaker on 19 November 2003 when she used Sessional Order 10 in an impulsive fashion and for her refusal to follow the ruling of Deputy Speaker McGrath recorded in the *Rulings from the Chair*, July 2003, at p 71 which reports as follows ‘the Deputy Speaker drew attention of the House to his concern about continual requests for the withdrawal of words that have, in the past, been used regularly in the cut and thrust of debate. He pointed out that when members decide to take exception to words used in the House, they should be mindful that they do not paint themselves in a corner and so reduce the vocabulary that can be used that future debates will be inhibited and that common sense is needed’ and instead for using the narrowest interpretation of parliamentary practice.
- 29 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for — (a) doing nothing to prevent the recent but repeated refusal of applications for in-ground swimming pools by VCAT, and the Cities of Glen Eira and Boroondara in particular, on the grounds that excavations for such pools would constitute ‘quarrying’ and hence be in conflict with old covenants preventing quarrying or mining in metropolitan Melbourne; and (b) forcing residents with applications to expend tens of thousands of dollars pursuing legally difficult applications for covenant removals despite in-ground pools existing in immediately adjacent homes.
- 30 **MR BAILLIEU** — To move, That this House congratulates the Australian Rugby Union for its exemplary conduct of the 2003 World Cup, Martin Johnson and the English team for their amazing last gasp victory, George Gregan and the Wallabies for their sensational efforts and all other teams, fans and volunteers for their high-spirited, good-hearted support of the heavenly game and this tournament in particular and urges the earliest possible inclusion of a Victorian team in the Super 12 competition, pending a return bout in 2007.
- 31 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Osborne Primary School by capriciously imposing a \$10,000 WorkCover penalty which will cause anxiety for the school and its management and further, that this House expresses its support for the School Council President of Osborne Primary School Mr Ric Bugg, who has said ‘were the school to move to a significant WorkCover disincentive in the future, (potentially through no fault of our own), up to \$10,000 would not be available for the education of our children; we find this totally unacceptable’.
- 32 **MR PERTON** — To move, That this House condemns the Member for Western Port for failing the students of Osborne Primary School by acquiescing to the Government’s imposition of a WorkCover penalty and failing to stand up for the rights of the students and parents of Osborne Primary School.

- 34 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for knowingly misleading the House when she said in debate on changes to the Urban Growth Boundary that public submissions made on the implementation of Melbourne 2030 were available on the Government website when they are not, and never have been.
- 35 **MR BAILLIEU** — To move, That this House condemns the Minister for Planning for failing to provide any legal advice that submissions made on the implementation of Melbourne 2030 could not be made available because of the Privacy Act (as claimed at a briefing on changes to the Urban Growth Boundary) when the request for submissions specifically contemplated public release and legislation and standard practice provides that all submissions to panels are made public.
- 36 **MR PERTON** — To move, That this House condemns the Minister for Education Services and the Bracks Government for failing the students of Coburg West Primary School by capriciously imposing a \$10,000 WorkCover penalty and further, that this House notes the comment of the school council which states — ‘(a) our school has incurred a premium cost to the school of \$10,000 which will have a considerable impact on the education provided to the children; as this premium will be deducted from the staffing credit component in the school global budget the direct result is there will be less teaching time available; (b) we agree that schools should be prepared to accept responsibility for situations that they believe are within their sphere of management, but in many cases WorkCover liabilities are way beyond our control; and (c) at our school we take the responsibility of providing a safe workplace extremely seriously and have in place a rigorous process of safety inspections including the provision of professional development in voice care’.

- 39 **MR PERTON** — To move, That this House condemns the Member for Morwell for failing the students of Traralgon South Primary School by acquiescing to the Government’s imposition of a \$2,900 WorkCover penalty and failing to stand up for the rights of the students and parents of Traralgon South Primary School.

Council has concluded that we might well be advised to reduce the level of sporting competition in the school for it was at a school athletics event that the injury referred to above occurred ... was it intended when this policy was drafted to have this impact on schools’.

WorkCover is a systemic problem and not the responsibility of individual schools’.
- 51 **MR PERTON** — To move, That this House condemns the Member for Hastings and the Member for Western Port Province for failing the students of Langwarrin Primary School by acquiescing to the Government’s imposition of an \$8,000 WorkCover penalty and failing to stand up for the rights of the students and parents of Langwarrin Primary School.

- 61 **MR BAILLIEU** — To move, That this House notes with alarm the annual report of the Surveyor General and in particular the Surveyor General’s comments that administrative arrangements undertaken by the Government and the previous Minister which transfer responsibility for the Survey Control Network and the calibration of surveying equipment to Land Victoria’s Land Information Group and the transfer of the supervision of the Central Plan Office to the Land

- 264 **MS CAMPBELL** — To move, That this House sympathises with the Liberal Party for its obtuse and naive policy, if it can be called such, of introducing a Hoon Hotline which will do nothing more than obfuscate the problem, increase delays and give vexatious complaints with an

- 265 **MS CAMPBELL** — To move, That this House laments that the literary community of Victoria will be, to the delight of members on this side of the House, denied the chance to read the latest round of propaganda on former Premier Jeff Kennett, as the Bracks Government rightly refuses to indulge Mr Kennett's ego any further at the expense of Victorian dollars for a work which would be better suited to its subject matter were it to be printed on softer, perforated paper.

- 268 **MS ASHER** — To move, That this House notes the Government's new policy to try to deliver major projects on time and on budget — the Gateway Review process — described by the Minister as follows 'This government's way of dealing with that is to methodically go through six gates — one, two, three, four, five and six. As we go through those gates we will announce the outcomes. As we go through those gates we will with confidence go to the next step so that we do not have cost overruns and we do have strategic decisions in place' and expresses its curiosity and incredulity as to whether this method can deliver projects on time and on budget — something two previous Ministers for Major Projects could not.

- 384 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for his continuing failure to recognise the anxiety and concern in rural communities over his attempt to unilaterally impose new rural zones without local community support, the loss of value such direct translation may cause and the failure to respond to councils’ concerns prompting South Gippsland councillor David Lewis to comment to the *Star* newspaper recently that ‘No progress has been made as far as I am aware since the public meeting in Leongatha months ago’.

NOTICES RENEWED ON 3 OCTOBER 2006

- 399 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for his unilateral implementation of new rural zones which has led to loss of land value for many land owners and in particular to a 59 year old Portarlington widow having her Centrelink widows pension being rejected because of an asset reassessment of her property which she can now not realise and leading her to say in an article by Lauren Pike quoted in *Geelong Info* on 12 March 2006, that the new zones would ‘destroy the livelihood of many people across the State’ and ‘It’s an absolute nightmare. - 405 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for the flawed Broiler Farm Code which has led to inappropriate applications such as the multiple application and approval on 24 February 2006 by the Victorian Civil and Administrative Tribunal of five separate but linked broiler farms in Lethbridge when the location of those broiler farms was inconsistent with the Government funded planning study undertaken by Golden Plains Shire to identify suitable land and which has led to abutting Lethbridge residents facing considerable loss of amenity and the town of Lethbridge having reduced capacity for residential growth.
- 406 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to prevent the Melbourne 2030 Planning Strategy from supporting development which is clearly regarded as inappropriate by local communities such as the proposal for a supermarket,

- 410 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to prevent Ascot Vale residents from being grossly misled by the proponents of the Government’s redevelopment of the Melbourne Showgrounds as to the impact of the development on traffic in local streets and in particular the massive escalation of the location, size and proposed uses of Gate 6 on Langs Road now earmarked for heavy vehicle access contrary to the explicit undertakings previously given to residents and for failing to respond to correspondence from affected residents.
- 411 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to address the serious outbreak of phytophthora fungus at the site of the Kew Residential Services development, for claiming he was unaware of the outbreak when the Government has been in possession for some time of a consultant report on the problem and for failing to respond to correspondence on the subject from the Kew Cottages Coalition when that fungus has already been responsible for the recent and rapid death of mature and rare trees on site and is capable of spreading to surrounding vegetation and parks.

- 416 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for further delaying a decision on the new bridge connection between Barwon Heads and Ocean Grove by calling in the issue and establishing yet another advisory panel and then ruling out consideration of the locally supported so-called 'third option' on the grounds that the third option would cross the local wetlands, when all options will cross those same wetlands.
- 417 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for failing to prevent the Melbourne 2030 planning strategy from supporting development which is clearly regarded as inappropriate by local communities such as the proposal for a seven storey supermarket, retail, office and apartment block at Burke Avenue in Camberwell which is not consistent with community expectations generated by the 1993 Camberwell Junction Structure Plan, the existing two storey permits on the site currently under construction, and the Municipal Strategic Statement and undermines the work of the current but incomplete Camberwell Junction Structure Plan Review Group.

NOTICES GIVEN ON 2 MAY 2006

- 431 **MR BAILLIEU** — To move, That this House condemns the part-time Minister for Planning for embarking on an expensive political stunt in taking the Federal Government to court over its Bald Hills decision when the power and responsibility exercised by the Federal Minister is enshrined in the Environment Protection and Biodiversity Conservation Act 1999 (Cth) and is a power equivalent to that exercised by the Victorian Minister when a permit was called in and approved for the Hilton and Jolimont projects and the exercise of that power was upheld in the courts in each case.

NOTICES GIVEN ON 3 MAY 2006

- 437 **MR ROBINSON** — To move, That this House condemns Australian Foreign Minister Hon Alexander Downer MP for the Minister's recently published criticism of former Australian Prime Minister Hon John Curtin, noting that Curtin's outstanding leadership of the Australian Labor Party and the nation over a 10 year period in extremely demanding circumstances was immeasurably superior to the Minister's forgettable eight month leadership of the Liberal Party, and encourages the Minister to devote any future free time to reading briefings and cables — as taxpayers expect him to — rather than attempting to rewrite history in such a shabby and self-indulgent manner.
